### **Hidden Room:**

On the level Bad Diplomacy get to the second floor and go right when you get off the lift. Go to the very end point and you will find a door. When you try to open it you should find it's locked. Put on your Q-Specs. Now look left and you'll find a hidden door open it and inside is Armour and Ammo.

### **Various point multipliers:**

To get the most out of the points allocated at the end of the levels try using these helpful hints.

"The night of the jackal" - when the jackal is standing in front of the crane once she is nearly dead, go to the right hand side of the room and press the green flashing button this knocks her into the big vat of hot stuff and kills her without wasting ammo and health.

"Oilrig" - On this level after you have finished of the men next to the helipad go into the lab and use the "Q-Remote" on the flashing green computer, now you can control ANY crane on the level. the first crane, outside the lab will drop a crate containing grenades, the second and third crane, accessible through a secret vent, this is at the second meeting with the boss guy, go left and use the laser on the vent, crawl through and open the big shutter door, then use the remote on the cranes and jump across the boxes until you reach the land, then you can pick off the enemies more easily and avoid that sniper! this also improves your points at the end of the level

"The Night of the Jackal" - when trying to reach the apartment use the Q-Claw to reach up onto the snipers balcony pick up his gun and this provides something to snipe men with and gives you a bonus points at the end of the level.

### **Get An Easy Bond Move:**

In Bad Diplomacy when you get outside to climb up the latter instead go out all the way to the rail and look up behind you you will see something like a speaker use your claw to get up there and you have a Bond move

### **Disable Lasers:**

On the level Bad Diplomacy Go up to the blue floor lasers and put on the q specs. You'll see a tiny door. Open it and use q laser on the wires to disable them.

### **Get Armory Key Card:**

In the First mission there is a locked armory to the left if you went in the front

## Xbox Cheats Guide

door, it contains grenades and a bazooka. To get the key card enter by using the claw on the vent outside, at the end of the catwalk you will drop down and see a guard facing away. Drop in, get right on top of him and hit him with your fist, he should go down in one or two hits and you will get the key card if you're close enough.

### **Secret Levels:**

Ok. Hoth: (You know the planet from Star Wars)

Get 6 platinums.

There is also a secret car level but I don't know how to get to it. ( Hey! I'm good but I'm not that good!)

Oh Yeah In Evil Summit It takes forever to:

Q-Claw up to the Ventolator thing. What's up with that!

### **Secret Floor:**

In the level Bad Diplomacy, when you go into Griffin's office you kill him, then use passcode generator on the computer. Then go back to Griffen's office the door on the far right hand side. If you use the "Key card" you use to get in originally then walk in. HURRY! you have to shoot the officer first. You will see the laser. Go to the right wall use your Q-Specs and you see a little door, open it. Use your Q-Laser to disable the laser. Get ready to kill 2 officers then don't worry there is a elevator to take you to the exit of the embassy. This will give you your last Bonus point to get 7-7.

### **Town tip:**

When you play multiplayer and go on town make sure you activate Q-claw and Q-jet. When you are playing, boost (jump first it makes you go higher) up on to the building closest to the cathedral. Get out your Q-claw out and Q-claw over to a balcony. Once inside you can sniper rifle people and duck to dodge their fire. Try and make sure you don't have the rocket launcher on because your a sitting duck and can be easily killed. Also if you are using a survival tatic you can boost from building to building, this works well on someone if they're not very good with the Q-jet.

**Hint: Duplicate Items:**

Start a new game with a character, earn some money, gems, armor, or whatever. Then save, start another new game with a different character and save the second character in a different slot. Load the save with the character you want to play as, and then import the second character as Player 2. Have Player 1 drop everything you want to duplicate. Player 2 picks it up. Then remove Player 1 and save with Player 2 in the second save slot. Reload Player 1's save. You still have all the items. Import player 2 from save 2, have Player 2 drop all the items picked up the first time. Player 1 picks them up, then remove Player 2 and re-import Player 2 as often as you want.

**Hint: Gather An Army:**

You can temporarily create a small squad of skeletons with the Necromancer, if you're willing to do some work. After summoning a skeleton, save the game. Immediately load that save game (the skeleton will be there) but you may summon another skeleton. Again, save and load the game to summon yet another skeleton. You may do this until you've got number of helpers needed.

**Hint: Purchase loads of EXP:**

You'll want to have a lot of gold before giving this one a shot. When you talk to Omiduil he will tell you about your past and you will get experience each time you do so. What you do need to do is save your game twice, once before you talk to him and once after you talk to him. Load the game where you haven't talked to him, and import your character from the game where you have talked to him. Repeat process of paying gold for EXP points. This will also work with the Cleric when she talks to the priest of helm.

**Hint: Weight Loss:**

If you've been adventuring for even a short amount of time, you've probably racked up enough Rejuvenation and Health potions to club a possessed rat to death. Well, if you play Ysuran, you should obtain his Alchemical Lore spell. Besides being very practical, changing potions from one type to the other, it also has a very hidden use. A healing potion weighs half a rejuvenation potion. If you've picked twenty rejuvenation potions and you turn them all into healing potions, you've saved a respectable ten pounds

### Bruce Lee: Quest of the Dragon

#### **Bruce Challenges:**

To unlock the challenges you must beat the game one time

#### **Bruces Challenge:**

Type X, Y, X, Y, X(2), Y, Y, click Left Analog Stick, Then Click Right Analog Stick, at the press start screen

#### **Bruce Lee Classical Moves:**

This will be fun if you have time and want to mess around with Mr. Lee. When facing a single opponent, use cinema moves like the Dragon Punch and send them flying for a nice classical Bruce Lee move! Try this, use Fast Punches or Fast Kicks, then when he/she is on the ground use the Power Drive and there goes another classical Bruce Lee finisher. If you didn't know Dragon Punch is the variation of the One-Inch Punch which is a single very powerful backhand that sends you flying (depending on how long you hold the action), the Power Drive is when Bruce Lee hops up in the air and lands on the opponent, abdominal region or on neck region, and stomps (if on stomach) or crushes neck then snaps it (if on neck). These moves were some of the famous moves of Bruce Lee and can be fun to use when playing! It is also fun to try these in training mode! Popcorn anybody?

#### **Advanced Battle Moves:**

When locked on you can concentrate on one foe right? Well, if you move the right stick in different directions you can attack enemies around you in different directions depending on where you point the right stick. This can help you when you lock on and a few guy try to sneak up on you. Oh yea, ps. this is another great Bruce Lee Move, anybody tries to sneak up on you just give em' a backhand or elbow and send them to the floor. Another great Adv. Tactic is to run a good distance away from the battle (which is highly unlikely for Bruce Lee to do...) then lock on to the nearest enemy, run up to him and give him a flying kick or run a short distance away hold Block and after the attack tap the Kick button and Bruce Lee should do a very quick and strong kick. Also if you are already a good distance try these attacks. Also try blocking then after the foe attacks use a Counter or Throw Move and after he/she gets up use a Multiple Low Spin Kick and if he/she gets up ! use a combo or a fast power attack. When a foe is crouching using sweep attacks is a good idea also

#### **Using Dragon Tokens Efficiently:**

message: Dragon Tokens are special tokens that boost power, speed (slightly), ability to break most blocks. In order to use them correctly, you have to time them right when they are all close to you, that way you don't waste precious time. It is also helpful against sub-bosses and the harder fighter guys (i.e red ninjas, guys with leadership coloring, big fat guys). It also helps to save a bunch during the boss fights where you will need them at times.

#### **Easy Dragon Tokens:**

A good way of getting Dragon Tokens is by doing combos (i.e ->A A A B) which gives you double multipliers, and it also makes the enemies drop more tokens than usual and sometimes peices of the dragon. Another way to find Dragon Tokens is by finding boxes, fruit containers, barrels, chairs, and other destroyable objects, by kicking them, sometimes they will reveal all kinds of items.

#### **Hints During Battles:**

In order to use Bruce Lee efficiently is by taking out the other enemies and then

## Xbox Cheats Guide

when they are stunned and knocked out, concentrate on one of them. When you have defeated him go back to the other enemies and use multiple enemy attacks such as Multiple Jump Kick, Multiple Hurricane Kick and Multiple Low Spin Kick. If you have trouble getting close to an enemy he/she might be backing up, so lock on to someone else ( I call this taking turns) it seems as though the enemies are taking turns, some of them back up and you see the others get close to you. In later levels though this disappears and you deal with all of them at the same time. When it comes to sub-bosses and bosses use moves like Counters and Throws. Early in the game these attacks won't be available so always be prepared to block. !REMEMBER! I started the game accidentally on HARD and you have to constantly use the Block. On EASY on the other hand blocks are always helpful too considering that taking on nume!

rous foes can chip away at your health meter. When fighting sub-bosses and bosses always use the block if you anticipate an attack. This will greatly help you to Counter and Throw when he/she is near you after a blocked attack. Using these strategies in unison with the Dragon Tokens can have devastating effects!

### **Hints For Ranking Up:**

This is a hint to help you rank up easier. Make sure to accumulate enough coins though. When rankings come up, get only attack boosters and health boosters. After 2 or three rank ups, learn at least 1 new move. Moves that will help you deal with multiple enemies is a great move. Get moves with multiples like hurricane kick, hook kick, jump kick, and low spin kick which greatly helps you. Multiples forward and backward fist spins you can get later. When you have ranked up higher like purple or dragon, moves like grabbing and countering you should get first. !REMEMBER! Always get all of the health and attack boosters possible in the current rank before moving in the next rank. Believe me these things really help... even though Mr. Lee is already a powerful fighter.

### **Hint: Reset Your Access Code:**

To use cheats in Colin McRae 04 you have to get cheats that work specifically for the access code you have. To view your access code, look at the secrets section of the Options menu.

While we have cheats for a good number of access codes, we don't have them all. However, you can change your access code to one that does match our codes. To change your access code, delete the Colin McRae 04 auto-save file from your Xbox and restart the game. When the game asks you to enable auto-save say "Yes" and it will create a new save file with a randomly generated access code. You can repeat this as many times as you want to get an access code that matches ours.

Since this requires deleting your save file, you may want to make a back-up of the file on your memory card. Or, if you don't have any important information saved, you can just delete the existing file to get a new access code.

### Conflict: Desert Storm

#### **BLOW UP TANKS WITH C-4!!!:**

When you have to blow up a tank and you dont have any rocket launchers, take your C-4 and have it out then have another team member, or you, throw a smoke bomb right next to it then the person with the C-4 runs to the tank and you have to get all the way against it then crouch down and and face it put one piece of C-4 on it then throw another smoke bomb and when it covers the tank or makes it so it cant see then get on your feet and run back to your team members then detonate the C-4.

#### **Beating the last level:**

Ok when you get to the very last level put some mines in front of the building so when the guy runs out he will die and you wont have to run after him and kill him. Do all that before you use your laser.

#### **Beating The Tank Level (You get to use):**

First you have to get all the rockets in the first part of the level. Then take the tank and blow up the tank shooting at you, just after the first barricade. If you look just off to the right there is a pass that will bring you to the closest tank. Look to the right and blow up that tank too. First tank, throw a smoke grenade then run up plant the C-4 and run! Do the same thing for the second one parallel to the first. If you look directly after the second non-blocked tank there is a pass that ends at the cliff. Destroy the tank and the guy. Turn around and go left down the road. BE CAREFUL!!! A tank is waiting for you around the corner. Destroy that tank with yours then move on. The rest of the level shouldn't give you much trouble. Good Luck!!!!

#### **Heal Dead People:**

When one of your people die, right when they fall get your medikit. go over to him and it will say, "heal" press the A button it will heal them almost all the way.

### Conflict Desert Storm 2

**Cheat mode:**

At the main menu, press L(2), R(2), X(2), Y(2), B(2). There is no confirmation message. Start a game, then pause and enter the options screen. The "Cheats" option will be available at the options menu.

**Extreme mode:**

**Healing falling teammates:**

If one of your teammates falls to the ground, throw a smoke grenade near him. Then, get your health packet out and heal him.

**Destroying armored vehicle or tanks:**

Use Jones to run up to the vehicle or tank. Lay an anti-tank mine next to it, in turn sacrificing Jones temporarily to take out the vehicle or tank.

Use Jones to run close to the tank, then plant a C4. Throw a smoke grenade on the tank, run for the nearest cover, then blow it up.

Have one of your team members run by the tank to distract it. Then, run up to the tank, plant C4, and blow it up (risking your life). You can heal him with the other team member.

Tanks are weak in the following locations: their rear; in front, in between the armor over the tracks; and where the gun barrel meets the turret.

### Dead Mans Hand

#### **Solve Xbox Live Menu Lag Issues:**

If you experience a lot of "lag" (slowdown, jerkiness etc) in the Menu area of Dead Man's Hand, we have discovered that it's due to large Friends list. If you play with an account that doesn't have a large Friends list, this will clear up the menu lag issues. If you don't wish to delete your Friends list or create another account try this at the menu screen: Hold down the d-pad in either up or down direction. The highlight will start moving. Once the slot is highlighted two (2) selections from your desired selection, simply release the d-pad. You will find it stopped where you wanted it to. Then hold down the "A" button" until it goes to the next screen.

Keep doing this until you have about 150 books then read them all and fill in your abilities. It takes some time but it's worth it (you can also do this with HP and MP if you find one of those potions).

### **Virtually Weightless:**

This loophole allows you to carry as many thousands of pounds of crap as you can possibly muster on your person. Follow these steps in their simplicity.

1. Get as many strength altering items on your person as possible. Ogre Gear as I like to call it. Now load up with as much junk as you can carry... reach your weight limit.

NOW

2. Hold down these buttons all at once: L + A + Y (This is the cheat console)

3. Now put in a code like PAQUIN (tome of lessons) as it creates a tome of lessons in your inventory. (repeat this step as many times as you want by simply hitting the accept button over and over and over until your hand goes numb)

- 3a. You will notice that items created in this fashion do not add to your burden.

4. Next, drop all of those heavy tomes. You will notice that it will think that you dropped the weight.

5. Viola! You are carrying all that you were before, but it says you are carrying 0lbs.

### Elder Scrolls: Morrowind

**Own house:**

To own your own house, all you have to do is go and kill the owner of the house you want once he is dead he will never come back. Everything in that house is yours for the taking. So then you will have a house to sleep in.

**Level up easily:**

To level up easily, jump continuously, until it says your acrobatics skill increased. This will add one of ten points to your leveling meter. You have to jump around approximately two minutes to get one level point.

**Ultimate Money Cheat:**

First of all, you must have about 1,000 or more gold coins and be strong enough to kill a common shopkeeper. What you do is go to Caldera and look for the Creeper (he's located upstairs in the crummy shop with orcs in it). Now, he will buy whatever you sell him for what it says its worth, so sell him all of your money for the price you gave him or more. Do this several times and he will hold the amount he buys from you (if you sell him 1,000 gold coins 10 times he will have 10,000 gold coins) then kill him and take it all back! p.s. the more money you sell him (up to 5,000) the more he will hold.

Fifa 2003

**Get Seoul Stadium:**

Win the International Cup

**Win a stadium:**

All you have to do is win the championship club with a club and you will get a new stadium

### FIFA 2004

#### **Easy win:**

Choose a side to play on. Then during a game, press Start and choose "Select Sides". Move your controller under the opponent's side and resume the game. Then, score as many goals as desired (while under the opponent's side), then just switch back to your side again. This way you will have a big point lead, depending on how many goals you scored. This trick also works better when you switch back to your side near the end of the second half.

#### **Fancy footwork:**

At any time during play, hold Black and move the Right Analog-stick to execute moves. Side to side does a stepover, back pulls the ball back, and rotating it in a circle does a maradona.

#### **Ball catch effect:**

When shooting, press the Right Analog-stick slightly sooner.

#### **Getting good players:**

Go to the options menu then to "Player Swaps". Swap all the good players desired onto the team you want to play as, then save that as a squad. Call it whatever desired. Then go to "New Season" and select "Current Squads" and play your team. This is useful for a third division team. This team now has all the good players.

#### **Buying players:**

If you want to buy a player, bid for them about 1 or 2 million above the asking price. This ensures you of signing that player. Players that are worth buying include:

Thierry Henry  
Ronaldinho  
David Beckham  
Ronaldo (either)  
Tim Howard  
Roberto Carlos  
Alexandre Del Piero  
David Bellion  
Ruud Van Nistelrooy  
Hernan Crespo

In the first year, it is almost impossible (unless you bid over 5 million above the asking price) to buy Thiery Henry, David Becham, Ronaldo, and Del Piero.

#### **Recommended team:**

Create a team with the following players:

#### **Goalkeepers:**

Tim Howard  
Iker Casillas  
Defenders

Rio Ferdinand  
Paulo Maldini

### **Usefull plane tricks.:**

When you hold the triangle button and flick (or hold) the analog stick/directional pad up, down, left or right. (regular plane controls) You get...

triangle + up = "Dive Bomb" (pull up to stop the dive bomb when you desire)

triangle + down = "Somersault" (you use this in the mini game "Torpedo Run". You can't cancel out of the somersault when it's going. When you are accelerating you do a big one and a small one when not accelerating)

triangle + left = "Left Barrel Roll" (it will make your selected character do two rolls when you do this. When you hold the analog stick longer the left, you do a longer barrel roll. You'll automatically stop at a certain time when you can not barrel roll any more. It sort of works when you want to stop doing a dive bomb except that you continue going for one or two rolls then stop.)

triangle + right = "Right Barrel Roll" -see "Left Barrel Roll" description-

When you hold the L1 or R1 or both buttons and turn in the direction you want (left or right); you'll make sharper turns.

## Xbox Cheats Guide

L1/R1 or both + triangle + down = "About Face" You turn around and fly in the other direction you were flying.

This is good to use if you accidentally go the wrong way. Holding

L1+triangle+down makes a slow "About Face" You stay in that one spot and turn slowly (which wastes time) if not in Torpedo Run.

Holding R1 plus the other buttons make a fast "About Face" but it still takes longer.

Using L1/R1 plus the other buttons will make the best "About Face" you can do.

So I recommend doing L1 & R1 + triangle + down combo.

### Scarface Easter Egg:

In Vice City, there's a Scarface easter egg in the form of a bloody bathroom and a chainsaw weapon.

## Xbox Cheats Guide

Go to the Pay N' Spray at Ocean beach, then go south and take the first left. On your left, you'll see a two story apartment with two sets of stairs on the second floor.

Head up the stairs to the right and you'll see a black doorway. Check out the bathroom in apartment 3c and compare it to the movie.

### Gunmetal

**Cheat Mode:**

Go to the mission select screen and press Left Analog Stick, Black, R, Right Analog Stick, White, L

**Finish Current Mission:**

During gameplay press Left Analog Stick, White, White, Black, Right Analog Stick, White

**Change Music:**

Go to the Front End and press Left Analog stick, Left Analog stick, Right Analog stick, Right Analog stick, L, R

**Spoof Mission Briefing:**

Go to the armory screen just before launching a mission and press L, L, R, R, Left Analog-stick, Right Analog-stick. ONLY works on missions 1, 3, 6, 8, 9 or 14

**Easier Control:**

Use Hybrid control for easier control. This may seem awkward at first if you're used to using the 'Classic' control scheme. Trust me I went from Classic to Hybrid. This really helps. The controls for the Gunmetal Mech is the same. The Jet controls are different though. This is easier because the brake and thrust is the Left and Right Triggers. So you don't have to take your finger off of the Right Stick (Classic Mode) to press barrel roll (B button in Classic Mode). Try to practice with Hybrid Controls and play through beginning of the levels to the current level your at till you finally feel comfortable. (This makes dodging rockets easier and also the Right Stick on Hybrid is a quick weapon select which is very handy so you won't have to press A constantly if you use Classic Controls

## GUNVALKYRIE

**Unlock Challenge Mode:**

To unlock Challenge Mode, which allows you to go through and select any level you've played, beat the game once (a feat which is more difficult than it sounds).

### Halo

#### **Secret Cave:**

There is in level 5 a secret cave at the bottom of the map entrance. It comes out on the side where they are not expecting a side attack from that side and it shall be easier.

#### **Get New Ending Sequence:**

Finish the game using legendary difficulty setting in Campaign Mode

#### **Carry 3 Weapons:**

OK to carry 3 weapons u have to beat the game (i beat it on easy) then when ur done u can carry 3 weapons

#### **Battling flood:**

Using a combination of assault, Shotgun, and grenades works best...

Warning: Only use the [sticky] grenades at a far distance, especially for the little ones.

Shot gun- use on big floods, and little floods.

When those little guys, that jump up at you, are all grouped together use the shot gun, it shoots out a lot of bullets at a time (you can see this if you shoot at a smooth wall, or the ground...you can see all the marks it makes).

Also close to medium range range to the big guys.

Use Assault rifle if the guy is standing still, if he or you are moving too much it screws your aim very badly and you waste bullets and have to re load more often and then they have a clear shot.

For the grenades use them when you know something is behind a wall, or when you see a lot of flood coming at you from a safe distance.

for sticky grenades you **MUST ALWAYS REMEMBER** to use them at a safe distance because if you shoot it on one of those little guys that follow you you will get hurt bad too because of the blast that they brought with them, same with the big guys; I have learned this because the the Master Chief doesn't run too fast so he cant out run a lot of the flood.

Don't use your grenades all at once..They are too important, and sometimes rarest when you need them.

#### **Battling the flood 2:**

When you fight the flood it is best to use a combo of the Assault Rifle (For the little dudes) And the Shotgun (For the big ones).

When the flood that look like humans come at you try to aim for their big arm. they will die instantly if you shoot it off. it is best to do this at close to medium range with the shotgun. but if you have to you can also use the Assault Rifle.

If you use Grenades try not to use the Plasma Grenades. try to use the Fragmentation grenades because if the flood run at you with the sticky grenade on them you are in trouble.

Also in order to get more check points try to kill all enemies in the area and the comp will generally give you a check point.

## Xbox Cheats Guide

Against the big flood just put a shotgun to their chest a pull the trigger it works best that way.

### **Bloody Warthog:**

To start things off lets just beat the game first!Now since the game is beat you should have a little fun.Now go to any level that lets you use the warthog.Now for the good part.When you see an enemy run over him.But it isn't that simple!If your enemy jumps out of the way do a donut and you should get him!Another cool thing is to take a rocket launcher and blast the warthog towards them and it might hit them and they will die!Now I have a great recipe for chicken noodle sallad,just kidding!

### **Battling easier:**

This is how to battle The BAD GUYS.

[Elite]

[M6D Pistol][Slow rate of fire and small clip size make this weapon ineffective against the fast moving Elites]

[MA5B Assault rifle][At minimum,prepare to extend an entire clip to bring one down{more,if your aim isn't sure}]

[S2 AM Sniper Rifle][If youve got it,use it.It will tear through the Elites shielding.A head shot will take them down instantly]

[M90 Shotgun][The closer you are,the faster they fall]

[Fragmentation/Plasma Grenades][The will dodge most grenades throw at them.Use grenades only if they are cornered]

[M19SSM Rocket Launcher][A waste of Rockets. Use smaller arms.]

[Plasma Pistol][Resist the urge to fire a power shot;an Elite will most likely dodge it.Instead,fire continuous bursts to bring them down more quickly than with the pistol or assault rifle]

[Plasma Rifle][Very effective if your aim is true.If not,the overheat can leave you vulnerable to a charging and angry Elite]

[Needler][Highly Effective.Empty a clip at the elite,and the needles will home in on it,piercing its shield and quickly dispatching it.]

[Grunt]

[Pistol][One or two shots should put a grunt to rest.]

[Assault Rifle][Highly Effective against one or many.]

[S2 AM Sniper Rifle][Can we say overkill?Obviously effective,but use it on bigger threats before grunts]

[M90 Shotgun][Can take down multiple Grunts with a single shot.]

[Grenades]Grunts are slow to respond to a grenade,so more than one can be taken out per throw.]

[Rocket Launcher][Akin to using an axe to cut better.It'll work but what a mess.]

[Plasma Pital...oops \*Pistol][Charge it up and take them out.For single shots M6D pistol is more leathal]

Plasma Rifle][You short bursts to avoid overheating.This is the weapon of choice against the grunts.]

[Needler][Great from a distance.Up close,however,you will take a lot of damage as you wait for the needles to find there target and explode]

### **Battle easier 2:**

[Hunter]

[M6D Pistol][Utilize its scope for effective long range [aim for its neck or back]if you hit the orange flesh right on you can take one out with a single shot]

[MA5B Assault Rifle][Really only effective if you shoot them in the back]

## Xbox Cheats Guide

[S2 AM Sniper Rifle][Aim for the neck or back]

[M90 Shotgun][Like the pistol one shot to the back should do it]

[Fragmentation/Plasma Grenade][Will only aggravate them, unless it detonates behind them]

[M19SSM Rocket Launcher][They should nickname the Rocket Launcher "Hunter Killer"]

[Plasma Pistol][Ineffective. Don't use the pop-gun unless you want a fuel rod chaser]

[Plasma Rifle][Go for the orange flesh, but human weapons seem more effective]

[Needler][The needles will bounce harmlessly off their exoskeleton armor]

[Jackal]

[Pistol][Fire a shot at the hole in the shield]

[Assault Rifle][Aim for the hole and unload]

[Sniper Rifle][Aim for the hole and it's over]

[Shotgun][If you're close enough it should knock them back, second shot will kill 'em.]

[Grenades][Jackals usually ignore them so throw 'em if you got 'em]

[Rocket Launcher][This will do the trick]

[Plasma Pistol]One charged shot will kill the shield second shot on 'em is death]

[Plasma Rifle][Will knock the shield away, leaving the Jackal's body]

[Needler][Ineffective, Will not penetrate shield]

---NOTE---

Melee attack will penetrate shield and kill them first time.

### **Plasma Grenade:**

If you're going to use a plasma grenade, try throwing the grenade on the alien where it sticks onto them. It will blow up on them making sure it will kill the alien. Also the aliens can do this to you if you don't move.

### **Description of Weapons & Best Times to use Them + Vehicles:**

#### HUMAN WEAPONS

Pistol- Has scope capabilities, great for picking off Covenant at semi-long ranges. NOTE- good for level three

Sniper Rifle-Armor and shield piercing rounds, Good for cloaked Eteles and semi-long ranges (you will see Etele's camouflage shimmer slightly)

Rocket Launcher-Basic Covenant-killer, Great for masses of grunts, hunters (can be a 2 for 1 deal) and especially Flood

## Xbox Cheats Guide

Assult Rifle-Speedy, great for masses but not for sniping, OK with flood, and good with grunts

### COVENANT WEAPONS

NOTE-Cannot reload (must get new)

Plasma Rifle-Great for masses and elete's, use in short bursts to avout overheating (drains power quickly)

Plasma Pistol- Good for eletes when cornered, Great for hunters when shot in back

### VEHICLES

Warthog-fastest human vehicle, good for hunters (machine gun on back)

Tank-The best for masses, and spectacular for hunters. Real messy however (turnes most covvant into mush and wreckes covenant vehicles)

Ghost-Quick, hovering, OK shot but bad defence make this vehicle quite a dish, be careful howver u can get blasted easily

Banshee-only thing that can fly but the best damn thing for just about everything

### **Silent Level Shortcut:**

This will help if your annoyed by always having to go back because the yellow dude locks the door. First find a warthhog and get some people inside. Go where the place where there are lots of guys and where kortana says the covenant are putting up a real fight. Go down completely with your warthhog and go at full speed directly where the yellow dude is. If you did it right then your warthhog will be half way through. Press forward and get out. Then pass the level like you usually do and come back where the warthhog is stuck. You may think it is impossible to get out but just press back and then get out. You will be in back of it and now you're done the hard part!

### **Master sniping technique:**

Heres a cheap sniping tactic to aggravate your friends with next time your in a deathmatch.

turn on all vehicles, weapons on normal, and play on the sidewinder level.

grab a sniper rifle and a tank, drive it up to the outer cliff on the blue light side where the rocket launcher is located, drive the tank around the cliff past the rocket launcher towards the outside of the portal.

now back it up the hill next to the portals outside door, the tank should be facing straight at the tree out in the middle of the level.

soon as it's been back up that it cant go any farther (enough that you could get under it) go get a ghost and go off the tank like a ramp.

this is a very stressing trick, it will take a while but you'll know you have gotten in the sniping spot when you fly off the tank out beyond the boundaries of the level.

now you can walk around the whole level and pop out whenever you want and snipe your friends and then pop back out so they cant hit you. (it looks like your flying and sometimes you can keep the ghost up there.

### Harry Potter and the Chamber of Secrets

#### **Win Broomstick:**

On the second day of school it tells you to go to the Quidditch practice, so go there. Now. Complete the training and get a B or higher, and the captain guy gives you a free Nimbus 2000 flying broomstick! You can fly anywhere around the school, only in day-light. You can't land anywhere except where you took off from. (Note: You can't fly in the school!)

#### **Unlimited Bertie Blotts Every flavour beans:**

Ok so when you get to Hogwarts you'll need Bertie blotts every flavour beans. So collect as many as you can before goin to hogwarts. try to get 50 because you need it. When you get to Hogwarts buy the Beans Bag so it can hold 100 beans. When you go out of the gryffindor tower you'll see a thing in the corner. Hit it with Flipendo and 3 beans will come out. Hit it again and no beans will come out. Now go around the corner (3 steps after the corner) then come back. Hit the thing again and then 3 beans will come out. Repeat the process and then u will be able to get Alahamora ^\_^

#### **Another way of quick beans:**

When you get your Nimbus 2000 you can fly above hogwarts and go through rings. A blue ring is 10 beans a yellow ring is 1 bean and a red ring is 3 and a green ring is 2.

#### **Quick Wizard Cards:**

### Harry Potter: Quidditch World Cup

**Team moves:**

Keep collecting Quidditch cards for your team until you receive the Quidditch Card for its special move. Note: Look at the locked cards to find out their unlock requirements. You must get enough cards to do the team's special move. A message under your team score will appear when you are able to do the team special move. Play well during a match to increase your Snitch power bar until the message appears.

**World Cup:**

Defeat all three other teams with one team to play in the World Cup. Note: At the Quidditch Cup for Hogwarts and the Quidditch World Cup, it is best to replay any matches that you have lost to keep your score up.

**Queerditch Marsh:**

Win the Quidditch World Cup with any country to play in the place where they first invented Quidditch, called Queerditch Marsh. You can play multi-player or against the CPU.

**Get Snitch gauge up:**

To get your Snitch gauge up, whenever you pass to another player hold L + R to make a combo pass. After that, you must score to get your gauge up. The more combo passes you make, the more your Snitch gauge increases. If you do a lot of passes with combos and the other team steals the Quaffle, you must do more combo passes to get your Snitch gauge up.

**Easy scoring:**

At the beginning of a match, hold the Left Analog-stick Up/Right to start out with possession of the Quaffle, making it easier for the first score. Usually making the first score assures that you will win the match as long as you follow the other scoring tips.

**More Quidditch Cards:**

Play the Challenges and beat the Team Record to get more Quidditch Cards.

**Better items:**

To acquire almost anything, you must first collect Quidditch Cards. To unlock the best broomstick, the Firebolt, you must collect 50 Quidditch Cards.

**Recommended team:**

The best team to pick for Hogwarts is the Ravenclaw team. The Ravenclaw team has a Team Special Move that allows to get 30 points.

**Faster brooms:**

If you want a really fast broom and play dirty team specials, choose Slytherin. They have Nimbus 2001 brooms and their special gets you 20 points. Japan has Firebolts, but does not have a strong team.

**House Challenges:**

For the Passing challenge, when a ring turns white, it is about to change to either yellow or green. Use that to see who to shoot it to.

For the Tackle and Shoot, it is best to tackle as soon as you can. When you shoot, look carefully for an open ring. Hold Shoot, then launch.

## Xbox Cheats Guide

For the Seeker, hold A until you get close enough. Note: It may be difficult to steer.

For the Beaters and Bludgers, the best way to avoid the Bludgers is to stay either ahead of it or to the side of it so the Beaters can whack it away.

For the Special Moves, use a similar strategy from Tackle and Shoot, except with a Special move.

For the Combos challenge, hold L + R down and keep pressing A as fast as possible to do up to eight combos. Watch out for the Keeper.

#### **Easiest way to beat slow bosses!:**

The best way to beat slow bosses like the teddy bear and the big monster with four legs is to use high fire power. They usually have help like monsters and ghosts, so get rid of them first. When they are gone equip a special weapon that is a gun. Run backwards and fire. To run backwards is to set the stick that is used to move the character back and the the aiming stick towards the boss. Keep firing the special weapons until its gone then use the basic fire arm that is unlimited. keep making it chase you while you shoot the crap out of it. Also keep your distance, the use a shockwave the can wrech you up.

#### **Beating the Warden for the Second time:**

OK, for those of you who can't figure out how to kill the Warden for the final battle listen up. The key to killing him is to not try and defeat him, but instead take out the window that he starts by. The light is what will kill him eventually. I suggest using the rocket launcher until you don't have anymore rounds and then switch to either your chain saw or some other type of weapon. Good Luck!

#### **Beat the Teddy Bear:**

The easiest way to beat the big teddy bear is with the chain saw. Just switch to the chain saw at the beginning of the boss level - and let 'er rip. Don't run or try to kill the other spirits first, just kill the bear. Chain saw does about triple the damage of any other weapon.

#### **Get the accuracy power up:**

When you get to the prison yard look to left there is a broken walkway jump up and follow the walkway to the rooftop there's a accuracy power(plus you get the rocket launcher there

## Xbox Cheats Guide

### **To get keys for doors:**

Whenever you need a key for a door go right and kill all the zombies(or whatever those things are)and one should have have the key it will drop it then go to the door.

### **Get through the beginning of MeatHill1 simple:**

"Tip: Have 3 or 4 Players"

When you start the level, run to the stairs in front, not on right. Then kill those 2 dead guards quick then go in the middle of the stair way, then fire at the dead teens, dogs, and guards that are around you. Do the same thing with the other stairs to your right, but before that, get the shotgun and machine gun to the left. Then go into the kitchen, go to the right, jump on the table right next to the right wall, then jump on the big oven so they can't hurt you. After that go through the single door way in front to get the key, waste those zombies quick for no damage then get back in the room. Then in the other room, fight like crazy with your sword/knife/axe at those guys who shoot those poison darts at you. Well, that's how you get pass the beginning of Meathill1, good luck on the rest.

### **Hint to fighting carpenter:**

For those who can't find a way to kill carpenter, because when you get him down to a millimeter of health, he heals to a bit more health. Read the computer in the office place that has the conviction healer (Looks like and E) Once you've read the comp, you'll have a big hint but if you don't know how, the electrocution chair he was standing on at the beginning of the cut scene must be destroyed before he can die.

#### **Basic strategy:**

In the beginning, horde the honeycombs. They are an extremely powerful strength booster. You will need them starting a few levels later in the game.

Also, you don't have to kill every spider

you come across. For the most part, you can outrun them and move faster than they can. Which means you can run circles around them and get your items from cracking open the little mounds of dirt that the spiders are always hanging around.

#### **Basic strategy 2 and 1st boss:**

Don't waste your firecrackers or apples either. You will need them later on harder enemies.

OK, presuming you made it out on your journey, you will come across a big tree who wants to eat your friends. You will have to beat the tentacles a few times that are popping out of the ground. Then the tree animates itself and will try to smash you with its main branches. That's the ticket,, hit his hands when they are resting on the ground. After a few good whacks, a jolly weird guy steps in and sings the tree to sleep. Fight is over.

#### **Basic strategy 3 and second boss:**

Try not to use the ring or steal your neighbors' stuff. All of which drops your humanity. The second main boss you actually have to fight is in a cave that you have to bust some rocks out of the way to get in.

I wasted all my ammo and then realized I had a note in my inventory that was from the guy who sang the tree to sleep (read basic strategy 2). OK, here's what to do.

Use your dagger only and you will have to hit him about 4 times before he disappears in the dirt. Do this sequence a few times and then Frodo will say he

needs help. Then read the letter by pressing the black button when you have it pulled up in your right inv. window,,, boss beaten. For extra goodies try to get the chest open that is sitting up on the ramp BEFORE you read the letter.

### **Spiders and Lillies:**

Ok if you don't like spiders you will not like this round. 12 lillies is what you need. For the first lillie and some cool weapons stay to the left after you leave the tree that you just defeated. You will come across a big Rock with spiders on the left of it.

Run right up to the rock and you will see a ledge, climb it and make your way to the top of the rock mass. Thats your first flower but before you get down look at the closest tree and you will see a sparkle up in the leaves. Throw a few rocks at it and it will drop some steal balls used for throwing. They land on the ground. Jump down carefully and get them.

Outrun the spiders except when you run across some bees wich means a hive in a tree and honey comb. You need that honeycomb so do whatever it takes to get it. The rest of the lillies are up to you to find. the first one was the hardest to find.

### **Get better walking stick:**

Go to the place where you find the thing that rings the bell. The man asks you to get him some ingredients for a pie. He wants a honeycomb and an egg. On your way from Bag end you'll see a building with a ladder next to it. There is a cram on top of the building. Climb the ladder. Then throw a rock at the wind pane. If you do this the guy will give you an egg. In order to get the honeycomb, just go to a beehive and start throwing rocks at it. A honeycomb will fall out of it. Take the egg and the honeycomb to the guy and he will give you a choice between ointment and a walking stick. If I were you, I would choose the walking stick because it is a useful weapon in the beginning of your journey.

Before playing your game, go to Owner's Box and max out money on all advertising. Play your game and you'll receive the attendance for the max advertising. When your game is over, go back to Owner's Box and drop all advertising to \$0. Go back to Play Week, uncheck the checked game and simulate the rest of the week. When you go back to Owner's Box and check your balance sheet, the amount of overall spending for attendance will stay the same, but you'll receive the attendance boost.

As soon as you do, go back into create a player mode, and change all of your player's attributes to 99. His wage won't increase until his contract is up, but he will kick ass on the field.

If you've made it to Size Matters, the second part, you know that at the end, there are about 9 or 10 mechs. If you try to fight them, kill the one in the middle so that it kills the others in the explosion. If you want to beat the mission, run past them to the mansion. Put a chaff on it to attract the missiles, then start shooting. Try to get other mechs by it so it hurts them when it falls. Otherwise, choose to make the helicopters crash on the mechs. Hopefully you make it.

#### **Instant Enemy Deaths:**

This code instantly destroys your enemy, as long as they are in the right place.

What you do is:

1. Make sure that your enemy is under, or RIGHT, IMMEDIATELY NEXT TO a bridge, or a building.
2. Use your weapons, cycling through them, to shoot, bomb, or just DESTROY the bridge/building.
3. If your enemy was under or close enough to the now blown-up structure, then the enemy mech will blow up, and be dead.

\*This works for YOU, too. If you are on/near/under the structure when it is destroyed, you will be... gone.

\*\*If you are in multiplayer Grinder, this works, also.

\*\*\*You can also weaken bridges beforehand, too. If you shoot the bridge enough, it will smoke, first at the far end, then middle, then close to you. Once it does this, a couple of shots will blow it!

**Cheat to Win:**

One way to cheat the system, especially in the playoffs, is to save your game, then configure your lineup and sim the results. If you lose, don't save. Reset the game and reconfigure the lineup based on their previous performance against that same pitcher. When you win, save the game again. Repeat to never experience defeat. It's the fastest (cheapest) way to win a World Series.

### **Hint: Barry Bonds:**

Barry Bonds may have been kept out of this game by withdrawing himself from the MLBPA, but his replacement, fantasy player "Jim Dowd", has all his attributes. Simply go to Roster Management and choose Jim Dowd (he's easy to find: he's the best player on the Giants, and one of the best players in the game). Edit the player's name to "Barry Bonds", his number to 25 and his hand to lefty. Edit his features to appear less like a random white guy and more like the famous slugger.

### **Hint: Easy MVP Points:**

When playing a Home Run Showdown or Pitcher Showdown, start the game on the MVP difficulty setting. As soon as the game loads up, pause and change the difficulty to something easier to handle, like Rookie or Pro. Now when you beat the computer you'll get the MVP points for winning on the MVP level, four times the original amount.

### **Hint: More Easy MVP Points:**

First, check your MVP Rewards Checklist. Many of the tasks require you to beat certain teams at their home fields. Start a game against any of these teams and choose MVP Difficulty for maximum points. As the game begins, pause the game and switch controller ports to be the team that you're supposed to beat. If they are batting, simply swing and miss every pitch, and you will get large amounts of points for a Perfect Game, No Hitter, Shutout, and Complete Game. That's a couple of thousand points right there. When this team is on the field, just lob fastballs over the heart of the plate, or intentionally walk the batters and serve up Grand Slams. You get tons of points for putting up large offensive numbers. Now the most important part. At the end of the game, it is imperative that you switch the controller port back to the original team that you selected in order to receive credit for the final results. Since you need to beat the home team, they will have the last at-bat. So in the last inning, take control of the home team and do the "Swing and Miss" trick. Then on the final strike, swing as soon as the pitcher releases the ball, then quickly pause the game and switch the controllers again. It will be as if you aquired all of the stats for the visiting team, and you will be

## Xbox Cheats Guide

rewarded heavily for your performance.

### **Hint: Simulate to Earn MVP Points:**

In Dynasty Mode you receive MVP points periodically for accomplishments. Assemble a team you feel is good enough to simulate to the playoffs (hint: Yankees). Simulate the season up to the second to last game and then save the game. Once you have it saved, simulate the last game and move into the playoffs. Generally, you receive anywhere between 5000-9000 MVP points for making the playoffs. Save the points onto your profile when prompted, and then exit the Dynasty mode without saving. Repeat the process and you'll notice that every time you simulate into the playoffs you're saving the points and not your progress. Do this about 20-25 times and you'll have enough points for all the rewards.

### **Hint: Ultimate Method of Earning MVP Points:**

Start a new dynasty with the YANKEES. In the DYNASTY SETTINGS page right after you chose to start a new dynasty and even before you choose which team, choose NO for a fantasy draft, put the difficulty level on MVP, turn injuries off, turn suspensions off, turn errors off, turn the trade deadline OFF, turn CPU initiated trades OFF, turn rained out games OFF, and leave everything else as the default. Also, you need to make sure you have the user profile set as PROF1 or if you have your own profile use that one and set it as that in the dynasty options page.

Once you're on the main page of the dynasty, go to SCHEDULE. Scroll all the way through the calendar to the last game of the season, since we are using the Yankees for the dynasty, the last game of the regular season on the calendar should be on October 3rd, so scroll to October 3rd and choose "Sim up to and including this day." It will take a couple minutes to sim through the entire regular season because the baseball schedule is long and it also has to sim through your two minor league teams associated with the franchise. Throughout the sim, various messages will pop up about the allstar game, minor league playoffs, etc. When these messages pop up, just ignore them and choose "Continue Sim."

Once the sim finishes, go back to the main dynasty page and there will be a couple of boxes that popup saying congratulations you've received 1000 or so MVP points, just click OK and ignore them, because that's not where the bigtime MVP points are. Go to "Advance to next day" and keep pressing continue until you're back at the main dynasty management page and a box pops up saying that the regular season is over.

Right now, save your dynasty and once you're finished saving it go to "Advance To Playoffs", you MUST make sure you save your dynasty at this point BEFORE you choose to advance to the playoffs. After you click on "advance to playoffs," a box will pop up saying "Congratulations, you have completed one or more tasks and have been awarded XXXXX MVP points." The amount of MVP points varies, however you are guaranteed to receive anywhere between at least 15,000 and 20,000 MVP points. Click on OK after that box comes up and press CIRCLE on your PS2 controller which brings up your profile options. When you bring up your profile options go to "Save Profile" and save your profile, it will ask if you want to overwrite previous data and choose YES.

There you go, you've just gotten roughly 20,000 MVP points. Do NOT save your dynasty, the only time you should have ever saved this dynasty was after you finished simming the regular season before you clicked on "advance to playoffs". At this point, just exit the dynasty and a message will pop up saying "are you

## Xbox Cheats Guide

sure you want to exit, you will lose all of your MVP points and unsaved changes", ignore this message and choose YES. You will not lose your MVP points because you have already saved your profile! You'll now be back at the main menu of MVP Baseball 2004. Just go back to game modes, then go to dynasty mode and load the dynasty.

Once you load the dynasty, just click on "Advance to playoffs" and you'll receive another 20,000 MVP points. Just save your profile and exit the dynasty, then just load it back up again, click on advance to playoffs again, save your profile again, and exit. You can do this as much as many times as you want, then just go to "My MVP" on the main menu MVP Baseball 2004 and go into "MVP REWARDS" and unlock EVERYTHING.

### **Easier College Classics:**

To ensure your success at the College Classics challenges, start a game, then go to the AI Settings in the Settings menu (from the pause screen). Set all of the CPU's offensive and defensive skills as low as they can go. You can also change any penalties you'd like. We suggest turning off defensive pass interference if the Classic you're trying to beat involve any sort of pass defense.

### **Easy EA Bio Growth:**

Once you create an EA Sports Bio, just leave the system on with the game running, and you will log hours to grow the levels of your EA Sports Bio.

### **Five Year Plan:**

It is possible to get five full years of eligibility for any of your players in dynasty mode. Begin by recruiting a player but do not redshirt him during freshman year.

Now before you end the season go to your rosters and use "Formation Subs" to sub the player into as many formations as you will want to use him in the next year.

Advance to the new season after doing all the normal off-season tasks. Go to the "Preseason Options" menu. Redshirt the player that you formation subbed. Exit the menu, set up your schedule and start playing.

The player that you redshirted will be in all the formations that you subbed him into. He will not appear on the depth chart and you will not be able to sub him into any other positions, but you will be able to use him and build up stats. So, when he is done with his redshirt season he will be a RS Sophomore but have played for two years with three more years possible (Sophomore, Junior, and Senior) for a total of five years of eligibility.

### **SMU vs. BYU Made Easy:**

In the College Classic Mode, make the SMU Vs. BYU game much easier by turning off penalties in the Pause Menu. This way, you can kick very short onside kicks (which are easier to recover) and not get penalized.

**Easy Way To Beat The First Boss:**

Keep running around those big "racks" to get full health, do this repeatedly to beat him.

### NFL 2002

**Better offense:**

Create three WR with a height of 7'0", weight 220 lbs., and stats at 0 for upper and lower body. Set everything else to 100.

**More time outs:**

Go to the controller options and change to the other team. Use their time out, then switch back to your original team.

**Easy sacks:**

When on defense go to 3-4 and select "Base". When on the field, select your outside linebacker and move him close to the line without crossing the line of scrimmage. Once the QB snaps the ball, use speed burst to run around and sack him. This will work almost every time unless there is a TE were your LB is located.

**100 rated players:**

To create a 100 rated RB, set the upper and lower body strength low enough to put all the other stats at 100. Then, fill up the rest on your upper or lower body strength. The same can be done for a QB, TE, WR, DB, LB, DT, DE. However, for the LB, DT, DE, make sure they are big. For a DT or DE set the weight to 400 lbs. and height about 6' 0". For the LB, set the weight at about 260 lbs. and make him 6' 4".

**Better defense:**

Create two players with a height of 7'0", weight 220 lbs., and stats at 30 for upper and lower body. Set everything else to 100 except jumping and block. Thrown ball should be 95 and intelligence 50.

**Get higher rated players in trades:**

The CPU will accept any trade that is within 4 points of their player, and not their best player at that position. For example, Player A 72 for Player B 76. Keep doing this until you get a decent player. Note: This works best with wide receivers and defensive backs.

**Super deformed players:**

Create a custom player and make him as heavy and short as possible and have skin number 6. You will be able to have created players up to 15 feet tall or as short as 3 feet tall. They can also be as heavy as 700,100 lb. and as light as 10lb. They can also have rainbow skin.

**One timers:**

When playing on the legends difficulty setting, it is very rare that a one-timer will work. The goalies and players are amazing in stopping that from happening. The trick is to take quick wrist-shots from odd angles, leaving the rebound to come out in front of the net for the semi-easy goal. This will work about 70% of the time.

**Ghostly players:**

When someone is checked and they go through the glass, sometimes the player will go through the wrong plate of glass. The glass will shatter two or three plates down. Note: You must replay it to find it

### Hint: Easy Cash:

I did this at the Clocktower in Tairon, but I'm sure it should work at any store. Simply go up the set of stairs marked by the blue border, and take care of the three enemies in the stairway. Now, go back down the stairs and return back up to kill the same three guys again. Collect the loot or health and repeat as desired! I found that if you use the Nunchaku, you can score around 30 or 40 hit combos, giving you up to 1,000 cash points at a time!

#### **Health Up With Out A Vendos:**

If you are near a SOBE or Health up but your partner is the one who needs health. Drink the vendos. Exactly at the same time preees the black button to switch to your partner. When done correctly life birds will rotate around your partners head.

#### **Lethal Electric Abe:**

While being Munch, go to a zap vendo, while Abe is next to him. Let Abe carry Munch with fuzzles following him and as you pass a series of enemies munch will be lethal and dangerous making abe carrying him almost invincible. But....there is a downside you have to do this in less than 5 seconds for Munch to actually fire without command. That is the part that gets really tricky. And about the fuzzles, if Abe is carrying Munch, if Munch gets hurt theylle automatically attack without command.

#### **Get Abe Across In The Mudoken Pen Easy:**

You have to be Munch and go across the water. Go on that metal walk way then switch to Abe. Jump in a water mine then drown. Then be Munch and near bye is a egg. Hatch it and Abe is across easier.

To find this goodie, you'll need to start from the Above the Baths save, once you have your new sword. Go down the stairwell that leads to a large cavernous area. After you make it through this area, you'll end up in a small room with Farah. There's a lever and gear in the center of the room. Turn it clockwise until it clicks twice. Both doors in the room are now closed, but you have also opened a secret door that you cannot see. Go to the wall directly opposite the entrance. Swing until you find a spot on the wall where your sword doesn't spark. Strike this area a few times to reveal a hidden room. Enter to unlock the game, which is now available from the main menu.

### **Hint: Double The Score:**

Try to grab gems and junk when you are wearing a special suit. The points are multiplied by two. The grapple arm suit has the longest lasting timer, so use that to maximize your score when grabbing gems over long distances, but in a pinch, any suit will do.

### **Hint: Look Don't Run!:**

There are two bonuses you need to watch for in order to get more points - one is a blue bug that hides fairly quietly in hard to spot areas. All Rayman needs to do is look at it in first person for a while and earn points.

The second bonus is a reddish alien flower that runs away if Rayman spooks it by running, dropping, or attacking. If you manage to sneak close to it, you can earn a lot of points.

### **Increase Max Energy:**

To increase your maximum energy, collect six cages. You can increase your max energy 10 times during gameplay.

Once you have lost, and it is a day ending in a "6", go to the used parts shop and the part will be all the way to the right under the "???". The part costs \$1980 and you can only use it once (by pressing Y button) in a drag race.

#### **Super Racing Muffler:**

#### **100 Missiles In Afterburner:**

When playing Afterburner, get to the third level and press Left+X. Your missile count will go up to 100.

#### **Duck Race Event:**

Just like Fangmei's birthday, this event is very well hidden. Check it out:

1) When you're chasing Wong through the Lai Lai Eatery miss the QTE so that you crash into the girl carrying the tray. When you have your bag and have been to the Come Over Guest House get some money (doesn't matter how) and go to the Lai Lai Eatery. Talk to the older lady owner, then talk to the waitress whose tray you knocked over. Choose the option to compensate her and she'll give you the bronze medal.

2) Now go to the Pine Game Arcade in Golden Qr and go up to the third floor. Beat Eileen in a fight and then beat Izumi. When you manage to beat them you'll get the silver medal.

3) Go to the Tomato Mart in Golden Qr and talk to Izumi and she'll take you to a duck race. If you win go to the part where you catch the leaves with Xiuying. After a couple of leaves you should see a feather floating down which you need to catch. When you've done this you'll get the option to catch a duck. Do it and go back to the Tomato Mart and enter the race. Keep racing it to improve its stats and when you win you'll get the gold medal.

#### **Fangmei's Birthday Even:**

One of the hidden events in this game that it's possible to find is the birthday celebration for Fangmei, the young girl at the Man Mo Temple. This is how you see it:

1) The first thing to point out is to talk to Fangmei every time you see her in Wise Men's Qr. Do this every opportunity you have. Now when Xiuying is getting you to catch the leaves to get the Wulinshu book quit and go to Pigeon Park (the big fountain in the middle of Aberdeen) and talk to Eileen, the martial artist training there.

2) When carrying the books to the temple library finish them all before noon. You'll have to run for most of it to make it, but when you finish you should get a cut-scene with Fangmei bringing you tea. For the next few days don't finish the book carrying task otherwise you'll get the scene again and will mess up the sequence.

3) After you have the Wulinshu and have decoded the paper with Guixhang, wait until the next day and go to the Man Mo Bistro in Wise Men's Qr. You should see Eileen and Fangmei together, go and talk to them. Now do the Chawan Sign at either the Man Mo Bistro or Heavenly Tea House (Green Market Qr). You'll be told to go to the Come Over Guest House where you will get a message to go to Man Mo Park (Wise Men's Qr). Go there where you will get into a battle and lose. This will trigger another cut-scene with Fangmei.

4) After the scene when you meet Zhang you will have a scene with Xiuying. The next day you'll have to take a detour through Lucky Charm Qr, so go there and see the cut-scene with Joy. After that scene go back to the temple library for another scene. Go to the Man Mo Bistro and you'll have to do a couple of QTEs. The combination for the first one is Down, X, and the second one is simply A.

## Xbox Cheats Guide

5) Go to the antique shops by the gate between Wise Men's Qr and South Carmain Qr at around 2pm and find Eileen. She'll tell you Fangmei's birthday. Now go to the temple to find Fangmei and follow her to a shop in Lucky Charm Qr. After the scene talk to the shopkeeper.

6) On March 3rd go to Xiuying's apartment where another cut-scene will occur.

7) Now when you reach the part when you're about to leave Hong Kong and are supposed to say goodbye to everyone, talk to Delin, Jianmin, Guixang, Master Zhoushan, and Zhangyu (you should know them if you've been paying attention through the game). After that go to Xuiying's apartment for a cut-scene. If this has all been done correctly you should get the birthday event when you leave Kowloon.

### **Shenmue Manga:**

Just go into your photo viewer on the main screen and press the X button to arrange your photos. After about 3 button presses you will come to a page with hazy photos. These are people you need to take photos of during the game. Once you have filled a page, a gift icon will appear on the album. Highlight this and press A and you will be able to see Shenmue manga. Each page filled gives you another chapter.

Shenmue On Saturn Video

Beat the game and look at the Shenmue Collection's Arcade section. You can watch a short trailer showing Shenmue (and parts of Shenmue II) running on the Sega Saturn before the game was moved to the Dreamcast.

### **The Bad Ending:**

Like Shenmue, Shenmue II has a bad ending if you take too long to beat the game. To see it in this game you need to play until June 31, 1987 in the game and then it will happen when Ryo goes to bed. The quickest way to do this if you want to see it is to play until the Zhangyu Barber's QTE and keep failing it. That way you can get to that date quickly. I won't spoil the bad ending for you but it's pretty cool to watch.

**Free money:**

Pause time, then quickly press **R2, L1, R1, L2, Left, Circle**. A Sim voice will say something to confirm correct code entry. A gnome should appear near the road. Select it for 10,000 Simoleons.

**All objects unlocked:**

**All visit locations unlocked:**

Enable the "Free money" code. Pause time, then quickly press **R2, R3, L3, L2, R1, L1**. A Sim voice will say something to confirm correct code entry. Note: This code can be entered any time after your Sim wakes up at Mom's House after the initial "Dream Sequence".

**Hint: Boosting a low budget:**

At Mom's house, Mimi's place, or Dudley's trailer, buy things until your budget drops below \$100. Wait about an hour. When the phone rings, answer it. You will get free money. Repeat this as necessary.

**Hint: Raise motives:**

To help raise motives in later levels, move back to Mom's house. The Artificial Love will make raising motives easier.  
Information in this section was contributed by Lupin III.

**Hint: Raising skills:**

While living with Mom, do not run out and get a job after you have completed the first few goals. Instead, stay around awhile and use that time to build skills. Mom will nag you, but just select "Okay" and keep doing everything else. Make sure to keep yourself happy and entertain/talk/joke with Mom to keep your relationship up to par. When you have your skills where you want them, move out. This will make things much easier. You will then be able to concentrate on your job and relationships, rather than skill building.

Notice that when you are at your Mom's house at the beginning, your Sim's energy and social do not go down, and will remain at the halfway point. Using this, you can raise your skills faster. First, have breakfast, lunch, or dinner. Then, use the toilet, take a bath, watch television for fun and comfort, then finally work on whatever skill you want. After repeating this routine before having breakfast, lunch, or dinner, clean up the plates. Do not call a maid or anything else, as it is a waste of money. For extra money, do creative skills on your paint set and sell your paintings when done. This will give you a lot of money when you are done with your skills. Do all goals except getting a job. Do not sleep or talk to your mom while doing this. When done with Cooking, Mechanical, Creative, and Charisma, buy a chess table for Logic. When you are done with those skills, sell the chess set (whole refund). Then, buy the weight lifting machine for the Body. When done with all skills, get a job and move out.

**Hint: Skipping work:**

In Bustin' Out mode, you can skip work by moving back into Mom's house. While you live with Mom, the bus will not arrive, and you do not have to work. This is useful if things are not going so well and you need some time to "restore" your Sim. In Bustin' Out mode, you can skip work by changing jobs before the bus arrives. Later, you can just change back to your old job. This is useful if you are

## Xbox Cheats Guide

about to get fired. Note: You will only get fired if you skip work two or three times in a row.

### **Hint: Never work:**

In Bustin' Out mode, the people who you live with (who you can control) cannot get fired. If you want them to stay home, just let them. This can be very useful if you need them to clean up, or need them to do some other things.

### **Hint: Get a bigger room:**

When at Dudley's trailer, go to the master bedroom. Then, sell the door that leads to the smaller room so that there is just a wall. Next, make a door at the top right corner so that there is a place you could walk into the smaller room. Then, decorate both rooms' wallpaper and carpet to be the same and you will have a bigger room.

### **Hint: Fishin' For Profit book:**

To get the Fishin' For Profit book go to Nikki Nack's store (open from 9 a.m. to 5 p.m.). After you buy it, find O'Phil Mclean. Give it to him and he will give you a job. Note: You must get the goals from him first. To do this, talk to Salty. Later in the game, you will be offered by Nikki Nack to buy the Waterfront Villa for 3,000 Simoleons.

### **Hint: Throw an art opening:**

When you move to Studio 8, one of the goals is to throw an art opening. In order for the art opening to be successful, you have to purchase a Sculpting Block and sculpt it first. Then, have the party and it will be successful. However, before you can purchase the Sculpting Block, you must complete the goal that will give you access to it.

### **Hint: Dead plants:**

When a plant is dead, do not throw it away. You can sell the dead plant for as much as a new plant costs.

### **Hint: Easy money:**

When you go to a house and do not have much money, trade in all the wallpaper and buy the cheap version. You can get a good amount of money. You can do the same thing with the tile

When you move into a house, sell all the wallpaper and tiles. Then, change the tiles to grass and the wallpaper to nothing.

#### **Unlock All VTs in Free Mission Mode:**

On the title screen, use the tuner and point it at these numbers at one second intervals between your choices:

1  
9  
7  
9  
0  
9  
0  
6

Entered correctly, the game will sound off. The tuner should be looked at as a 12-hour clockface with 0 in the 9 o'clock position, the 4 in the 12 o'clock position, and the 8 in the 3 o'clock position.

#### **Unlock Black And White Graphics:**

Give Tekki an old fashioned look by finishing Mission 23 on Veteran or higher difficulty. Press START + NIGHTSCOPE while the mission is loading to enable switching between colour and black and white.

#### **Unlock Full Screen Mode:**

Earn 550000 Command Points to unlock Full Screen Mode. Press IGNITION + START while playing.

#### **Unlock Infinite Fuel And Ammo:**

Accrue 100 hours of play time and complete the 2080 Campaign once more. During the loading screen, press START + MAGAZINE CHANGE to unlock infinite fuel and ammo (bye-bye Wagonmaster!).

#### **Unlock No Weight Limit Mode:**

Play mission 6 on Normal or higher difficulty in campaign or free mission mode. Fight to the Jaralaac base. Although you cannot enter the base yet (that's mission 7) you can "rescue" a friendly trooper past the base's doors.

The base entrance constantly spawns Jaralaac-Cs and Ns, and coupled with the fact that the friendly trooper is about the size of an ant (compared to your VT) you may have one hell of a time trying to find and grab the trooper using the manipulator arm.

NOTE: Do not press manipulator or switch to another sub-weapon; the soldier needs to be held in the manipulator arm to unlock the cheat.

Finish the mission by fleeing back to the mission's starting area. During a campaign or free mission stage, press START + MAIN WEAPON SELECT during the mission title (the screen before the briefing/purchase screen); if done correctly, the message "WEP ALL" will appear on the briefing screen.

#### **Unlock Quasar VT:**

Play Mission 7 or 17. As you enter the second floor of the Jaralaac base, head into the small room on the left. Kill the enemy inside and you will find a box in the back of that small room. Use the manipulator arm to grab the box and you will receive a transmission. Clear the stage and the Quasar will be unlocked for campaign and free mission modes.

### **Unlock Searchlight:**

For an alternate method of looking around during night missions, play Mission 20 on Normal (or harder difficulty) in campaign or free mission mode. A tan-shirt soldier will be randomly placed on one of the black iron truss watchtowers. Use the manipulator arm to seize and hold him and finish the mission to unlock the searchlight.

NOTE: Do not press manipulator arm or switch to a sub-weapon or the cheat will not be unlocked. The soldier needs to be held in the manipulator to count.

You may find it easier to kill two of the three enemy VTs on the map before searching watchtowers. Also, if you have access to the Juggernaut or Quasar, the 430 SB cannon can destroy empty watchtowers with a few shots in order to mark which towers you've searched before. During night missions (i.e., mission 7 or 17) the F2 button can utilise the searchlight, which may or may not help some pilots.

### **Unlock The Juggernaut VT:**

Earn 800000 Command Points and the Juggernaut will be available (Colonel rank). The Juggernaut is the same as the Quasar in most respects, but has a larger weight limit.

### **Unlock The Rapier VT:**

Earn 10 medals and the Rapier Light VT will be available.

### **Unlock VT Jumping:**

Finish Mission 23 on Magnum Force or higher difficulty. Press START + F3 while playing to make your VT jump (without using hydraulics). Done repeatedly, this jump can allow your VT to ascend to great heights.

### **Pause Trick:**

To pause the game, disconnect the controller from the port. When you gotta go, you gotta go, even if you are piloting a tank with legs.

### **Unlock Desperado Mode:**

Clear Mission 23 on Veteran difficulty to unlock Desperado Mode.

### **Unlock No Fall Mode:**

Beat the game in "Desperado Mode". During gameplay, press the HATCH and START buttons and your VT will never fall down.

### **Hint: Max Out Insanity Monster Attack:**

At the part of the game inside a prison, where you are supposed to help the guard get accros the wall, slayers will keep spawning until you shine the light on them. If you don't use the light and let them keep coming, keep killing the slayers as they come. When your insanity hits full, keep using the main attack until you run out, and repeat this as many times as you like until your little blue bar disappears in the lower right. When done, just shine the spot to stop the slayers, and continue on your merry little way.

### **Easter Egg: The Ring:**

Reach level fifteen, "An eye for an eye..." After you talk to your children and wife (whom are within the prision cells), some baddies appear and blow a hole through the wall. Going through this hole leads you into the COs breakroom. Before leaving this room, make sure you pick up the phone next to the door. A voice on the other end tells you "You will die in seven days!" in an obvious reference to the movie The Ring.

## Superman: The Man of Steel

### **Be Invincible:**

After pausing the game press rapidly: Black, White, Left Trigger, X, Left Trigger, White. A explosion signals correct code entry.

### **How to Get Costumes:**

At different points through the game after certain missions you will automatically unlock the following costumes

Original  
Golden Age  
Silver Age Superman Red  
Silver Age Superman Blue  
The Return of Superman Black  
Superman of the 90s  
Kryptonian  
Post-Our Worlds at War Mourning  
Kingdom Come

### **Free Roam Mode:**

After finishing mission 4 you will get Free Roam which allows you to replay any previously finished mission

### SWAT: Global Strike Team

**View game developers:**

When playing in two player mode, go to the mission where you have to protect Furious Thug. At some point you will reach a room with a lot of chairs and a jury stand in the front. Look at the walls until you see some pictures. They appear to be the game developers.

**Hint: Get inside building:**

When playing in two player mode, at some point you will reach a mission where you start behind a big pile of sand. First, clear everyone on the other side of the sand pile. Then, go back to the sand pile. Get directly on top of it and you will see a ledge beside the pile. Walk on the ledge and keep going until you reach a new area. You are now inside, or close to the entrance of the door.

**Hint: Mission 10:**

Mission 10 ( the last level) is just an outgoing mission. All you have to do is eliminate everyone or restrain a few people. Do not worry about stealth. Just take aim and run and shoot. You will not fight Carter and do not worry about trying to get better parts on your gun for the mission.

**Hint: Compliance:**

In every level you are required to arrest a certain number of suspects. Instead of shouting, if you prefer the assault rifle just shoot the suspects four times then shout for compliance. Sometimes they will give up[ others may die. Test this strategy on different people and find which ones may die when you shoot them.

On any solo or co-operative mission, choose the shotgun and shoot terrorists in the lower stomach region. They will put their hands up immediately, or as soon as you shout at them. If your aim is slightly off, change to tranquilizer (Y) and nail them with four to six shots or one magazine. They will fall to the ground, ready to be cuffed.

This can be done with the baton weapon - just before you "fire" the baton (i.e., attack with it), turn on the adrenaline and press fire. Once the animation starts, turn off the adrenaline to save it. However, if you continue to hold down fire, you'll notice the baton attack is "powered up".

**Hint: Easy Tech Points And Kills:**

Zoom your weapons to get a better aim. Attack the necks of endoskeletons for Skynet Tech Points. This also kills the enemy faster so you can deal with the tougher Hunter-killers.

**Hint: Zoom Controls:**

Turret guns can zoom if you press in the left control stick ("L3"). Pressing the left stick repeatedly with normal weapons also affects zoom.

**Control Intro:**

To control the intro sequence, press L or R to zoom in and out.

### The Thing

#### **Easy way to beat walkers:**

An easy way to beat walkers is to have a machinegun and flamethrower

#### **A big Boom!!!!:**

On the second level (when you get out of the helicopter for the second time). You will find a man in the building. heal him and tell him to follow you. after you get him away from the place he was you will see two canisters shoot them two times. after they explode use your fire extinguisher to put out the fire. In this room you will find ammo and a flame canister with one reload.

#### **Simple Strategy 1:**

Always keep your team members well stocked with arms and ammo, even if they are infected. It is easier to kill an infected member and take all his stuff then it is to backtrack trying to find more ammo.

Don't waste your medkits that determine DNA. If a team member is infected it will manifest itself in due time. Infact it seems to be scripted. I did a test on a member and it showed nothing. Then 5 minutes later he was a nightmare.

#### **1st boss strategy:**

Under the warehouse through a door is your first real boss. As soon as the cut scene has ended keep yourself to the left of the room keeping your back against the door. There is a tentacle that pops out of the wall on the right. Shot gun the hell out of the boss then use the flame-thrower on it until it collapses on the floor. You will have to shoot the little spider things as your killing the boss because there is a hatching bubble just the other side of the boxes your standing next to on the left of the room.

### Unreal Championship Adrenaline Moves:

You get adrenaline by either killing your opponents or collecting Adrenaline Pills that are throughout each map. Once your adrenaline reaches 100 it will start to flash and the announcer will tell you that your adrenaline is maxed. You now have 4 special moves that are available to you. You can activate these by doing special move combinations.

D, D, U - Agility: You will run faster and jump higher when Agility is activated. This adrenaline move works extremely well in CTF and Bombing Run, letting you escape death quickly.

U, U, U - Berserker: When Berserker is activated you will deal more damage to your opponents, similar to the Double Damage. This is a good move to use in Deathmatches and Survival.

D, D, D - Regeneration: Regeneration will regenerate your health and your shield. Your shield will max out at 150, but your max health depends on your race. This adrenaline combo works well for every situation. You can never have too much health or shields. When you have the flag or the ball, this can extend your life long enough to score.

R, R, L, L - Invisibility: The only 4 button combo makes your player almost impossible to see. There's no better way to sneak into an enemy's base. You are not 100% invisible so an opponent with a sharp eye can still catch you sneaking by.

As soon as you activate your adrenaline it will start to count down from 100. Your powers are only good during this countdown. Grabbing more adrenaline while it is counting down will extend your time out a bit also.

## Unreal 2: The Awakening

Crystals scattered in the various battle arenas protrude from the ground, and standing next to them will replenish your character's magic. The crystals vary in color, correlating to the four elements--they'll replenish anyone's magic, but characters with a matching element will replenish faster.

First, choose a wrestler that has some submission moves: (Kurt Angle, Chris Jericho, ECT.) Then when you go into a match, it should take about three or four times to make your opponent submit. This is very easy to do.

#### **Fast win in season mode.:**

All you have to do is get beating down by your opponent for about 2 minutes, after that, press start and choose BACK TO MENU, it should say that your the winner.

#### **Easy to steal:**

When in season mode and you want to steal something from one of the wrestlers, make sure that the wrestler you steal from is not a friend or a tag-team partner. Its easier to steal from your enemies. (WARNING: This does not always work. It works 85% of the time.)

#### **More Hidden Weapons:**

Go to the bottom of the ring when your outside of the ring and go up to the ring and press "White" and eventually your character will go grab a weapon from under the ring. You can grab as many weapons as you want.

#### **Easy Win In Hell In A Cell:**

If playing in the Hell in the Cell and the option KO is on, its possible to get a quick win. Climb the cell and do a move to your opponent from the side of the cell (ex. chokeslam off the cell, etc.) Your opponent will be out cold and you will win.

#### **Easy Way To Finish Season:**

Whenever you have a match you should "Rest" before your match. When you are in your match and realize that you are losing then just fight him outside of the ring and let the referee count and when it has reached about 9 seconds run back into the ring and the opponent should get counted out and you will receive a win. Do this throughout the season.

NOTE: You must pin or make him submit to win the title and to become king of the ring

#### **How To Steal Things:**

Go to that person that you want to steal something from and go to his/her locker room and steal

#### **Super F-5:**

To do the super f-5 you must be brock when you get your finsher whip someone into the corner and press A+X

#### **Win a Surprise Attack:**

I'm not sure if this works if you make a surprise attack in season mode, but if you are surprise attacked by a CPU opponent, simply pause the game and choose "Back to Previous Menu." You will then be declared the winner of the surprise attack.

#### **Hear voices:**

When the dash is started, leave it alone for a short time. The screen will eventually get dark, and you will begin to hear sounds. One of these is an electronic voice.

#### **Playing burned music discs:**

Burn music onto a CD-RW (not a CD-R) disc, and close the session when you burn the CD. Place it in your X-Box and rip it. Note: This also works with .MP3 files. The Xbox can store .MP3s and replay them later and saves a lot of space when compared to the .WAV files that are standard on audio discs.

#### **Console name:**

Each Xbox console has a "name" assigned to it at the time of manufacture. To view the name of your system, play Halo and link it to another Xbox and choose a linked play party. The Xboxs will have names above their symbols in the pre-game stat screen. To change your name, play challenge mode in Dead Or Alive 3. Successfully complete challenge mode and you will be prompted to enter a record name. Enter the name that you wish to change your pre-assigned Xbox name to. This will now be the title your Xbox is referred to during linked play. Note: This will only work one time, so be sure that you enter the name you wish to permanently have for your console. To see your Xbox name easily, start Halo, go into multi-player mode, choose "Split Screen", "Profile", and "Location". After all that is done, there will be a screen that reads "Waiting for more players". The picture of the Xbox is directly above your profile name, and above your picture will be a word. That word will be used as your name when Xbox goes online. This works best when there is only one controller plugged into the Xbox, so the multi-player game will not start before you see your name.
