Before playing in a franchise mode game, go to quick play, and on the team's options highlight "Change Uniform". Go back, exit quick play, load the franchise, and when you get to the play game screen on options, your pointer will be on the blacked out uniform part. Press A and you can change uniforms. Once you change lineups or pitchers, this option is no longer available; it only works for that one game

### **Easy points:**

Start a two player game, with only one actual player. Throw a perfect game, striking out every batter. Save the game in the bottom of the ninth inning with two strikes and two outs. Finish the game, collect your points, and save the options. Reload the game and repeat to collect the points again.

Change to the team that you are facing and make them play poorly, allowing your original team to score a lot of runs. In the last inning, switch back to your team and claim your team's cheaply made points.

### **Free balls:**

Restart the system, and when you go to the main menu, load the game. When you finish loading, it should automatically take you back to the game, and it should show your pitcher on the mound with the full green energy bar.

## **Aquaman**

### **Tempest and Black Manta:**

Successfully complete the game under the easy difficulty setting as Classic Aquaman. Tempast (Aqualad) has less combos than either Aquaman or Classic Aquaman, and no telepathy. However, he has an Ice Beam combo move. Black Manta also has no telepathy power, but has the best combos in the game (some of which require practice). The easiest move to use is the Heat Ray Beam attack or the Grab Heat Ray attack.

### **Classic Aquaman:**

Successfully complete the game under the easy difficulty setting as Aquaman. Classic Aquaman has no Morphing Claw, which means some of his combo moves are not available. However, he swims slightly faster and his telepathy call is different

## **Army Men: Sarge's War**

## Animal Crossing

### Easy money:

When bees appear from trees, take out your butterfly net and face the beehive. If you can catch a bee, you can sell it for \$4500.

Place orange furniture to the north, green furniture to the south, yellow furniture to the west, and red furniture to the east part of your house.

Note: This trick requires a Game Boy Advance and a link cable. Play the game with the Game Boy Advance attached. Collect as much fruit as possible and travel all the way to the south. Go the pier at the beach. A Kappa will be there and will to bring you to a new island to the south. Get to the new island and drop all of your fruit. Return to the Kappa and leave. Transfer the island to the Game Boy Advance. On the Game Boy Advance, knock on the door to the house of the island animal. After it appears, move a piece of fruit in front of the animal. It will eat it and become happy. Keep repeating this until the animal drops money bags. Feed all your fruit to the animal, then put your Game Boy Advance on standby. Resume the game on the GameCube. Go back to town, then return and talk to the Kappa again. Your game will now be updated with the Game Boy Advance data. Travel back to the island and collect the money bags.

### Golden Axe:

Get your town rating to be "Perfect" for two entire weeks. The Golden Axe is indestructible.

### Golden bug net

To get the golden bug net, catch one of every kind of bug.

### Golden Fishing Pole

You can earn a Golden Fishing Pole by catching at least one of each fish.

### Golden Shovel

To get the Golden Shovel find a "glowing spot" and bury a normal shovel in the hole you dig. A golden sapling will appear. After it has matured you will have a Golden Shovel. When using this shovel you become more likely to dig up better items and larger sums of money from the "glowing spots".

### Magic Rock

Every day, one rock in your village will turn into a treasure rock. Walk up to a rock and hit it with your shovel. If it turns red, quickly hit it again -- up to seven times if you're fast enough. Each time, a money bag will come flying out. The first few bags will be 100 Bell bags, but soon you'll hear the Mario extra life chime -- which means these bags contain 1,000 Bell. After the rock changes color again, it goes back to being a regular rock.

### Money Tree

Find a glowing spot, and bury the money bag found from it in that hole. A sapling will appear there now, and within a few days, you'll have a tree you'll be able to shake money out of (money tree).

### Feng-Shui Mysteries

Are you familiar with the ancient art of Feng-Shui? Who would have guessed that it even applies to Nintendo's Animal Crossing? It's all about how you arrange your furniture in your house.

Orange colored furniture in the North

Yellow furniture in the West

Red furniture in the East

Green furniture in the South What does this do?

It increases your chances with getting lots of cash and items -- so try to use Feng-Shui whenever possible.

### Bee Catcher

You've done it before -- you've shaken a couple of trees to find some cash, and out comes a whole swarm of bees and does a "remodeling" job on your face... Painful. But did you know that you can actually catch the bees and make some money? It's a bit tricky as the bees move fast, but after you've shaken a tree and a bee's hive has fallen out, immediately switch to the butterfly net and turn towards the hive. Time it right and hit the button and you will catch a single bee, worth 4,500 bucks. Not bad, huh? There are three swarms of bees hidden on the map every day, so you can make some big bucks if you go bee hunting.

### Secret K.K. Slider Songs

There are three secret songs in Animal Crossing that Totakeke won't play unless you request them.

They are:

I Love You

K.K. Song

Two Days Ago

### Reset Follies

Don't ever hit the reset switch when playing this game. If you do, the next time you play you will be chastized by Mr. Resetti, an angry mole. He will lecture you on how there is no reset button in real life -- so you shouldn't use it in this game either. Mr. Reset's rant takes quite a while to get through, but that's nothing compared to what happens when you hit reset again... His complaints will get longer and longer and he will even force you to apologize (which requires you to manually enter your apology via the on-screen keyboard).

### Win NES Games

Animal Crossing features an even bigger variety of NES games than its N64 counterpart. You have to be lucky to get your hands on them though. There are several ways to get new games:

\* Be the first. The first player to start a character on the included Animal Crossing Memory Card will receive a letter from Nintendo after all initial chores are done. The letter includes a grab bag with three items, two of which are NES games. To move a present attached to a letter to your inventory, align your cursor on top of the letter, then press L to grab it. Drag it to the inventory, then click on it with A and select "Open Present". To open the grab bag that's inside, simply select it with A when you're OUTSIDE a building. Do not try to open bags inside your house. It won't work.

\* Enter the monthly lottery at the Tanuki Store on the last day of the month. You get a lottery ticket for every major purchase you make at the store (stationary and plants don't count). Every five tickets let you play in the lottery once, so be sure to collect a bunch of them. Note that lottery tickets don't carry over to the next month. They're only good for the current month. Prizes in the lottery vary from month to month, so don't give up if you don't find any NES games the first time you enter the lottery.

\* Check your mailbox on Christmas Eve. Every player gets an NES game as a Christmas present.

\* Get a game for your birthday. Don't only ask animals if you can run chores for them -- use the second "conversation" option as well. At one point, one of your animals will ask you for your birthday and blood type. This animal will drop by your house on your birthday and personally deliver a new NES game.

## Gamecube Cheat Guide

\* Have your Animal Island villager dig. Leave him your shovel, then bribe him with fruit later if he finds a game.

\* There are other ways to get your hands on emulated classics, so keep your eyes and ears open.

### **3,500 Bells:**

If you hit a rock with your shovel, sometimes it will turn red knocking money out. Keep hitting it until you don't get any more money. You should get about 3,500+ bells from a single rock. Note: If you dig holes around you, the kickback won't be so harsh and you will be able to get more bells.

### **Golden Tree:**

Get a golden tree! First get two shovels. Find a gold piece of earth. Then plant one shovel in the gold spot. A gold sapling will sprout! NOTE: Don't plant it too close to a tree, rock or house or it won't grow

### Easy Turbo

When going off a huge jump do a 360 by pushing the direction stick right or left and do two tricks while doing the 360. The better the tricks the better the boost. If you can get more than two tricks in at that time thought it can help alot more and almost fill your boost totally in one trick.

### To get Viper and Dimension

Go to ATV academy (at top). Beat control training and trick training. Go to free-style mode, then it should show the ATVs

### Super flips:

Go to the freestyle level. Get your boost all the way up. Start going around the course to get speed. If you choose to use the loop as your take off, you need to boost all the way around it. Another good ramp to use is the one that is sort of under an elevated ramp; you will not need boost. To do many flips, choose your ramp and get speed. When you are about 20 feet away from the take off, hold Analog-stick Down. Keep it held and when you get to the peak of the take off, you will do many flips.

Use the following trick to do three or more flips on the ground. First, do a wheelie then keep it held. Hold Preload (R), and when it is full, release it. While holding Analog-stick Back, you will do three or more flips.

### Quick turn:

When going fast and are trying to turn, use the speed boost while turning. The bike will seem to jump forward.

### Backflip without going off jump:

Do a wheelie. Preload while doing the wheelie and release Powerup. You will do a backflip without going off a jump

### 190,000 experience, 500 skill points, and all or most spells/feats.

This code gives slightly different spells/feats to all three characters but it always seems to give you about all of the Sorceress' spells. It gives you 190,000 experience, 1000 Health and 1000 energy, and 195 for your base attack. It also gives you one rank in each of your feats to go with the 500 skill points. Warning: This gives you exactly what has been said, regardless of your level, experience, or spells and feats.

To use this cheat, simultaneously:

Press and hold the "L" trigger,

Press and hold the "R" trigger,

Press and hold the "X" button,

And finally, Press and hold Right on the D-Pad.

There will be no special way of it telling you you entered it correctly, but when you check your spells and feats you'll have a full menu.

### Control loading screen:

Move the Right Analog-stick and the flames surrounding "Loading" will also move.

### Duplicate items:

Save the game, then drop the items to be duplicated from the inventory of your current character. Press Start and choose to change your character. Import your character from the previously saved game. The game will bring in your character with all items in inventory at the time of your save, and allow you to collect the duplicates that are on the ground.

Save the game and use a Recall Potion to return to the Elfsong Tavern. Drop all your expensive items, then import your saved player. Pick your items up and sell them. You can do this as many times as needed, have to save each time before you import again or you will lose the gold you have made.

### Easy items:

If you have a high level character with many good items that you would like a new character to have, start a new game with the new character. Then, load the character with all the items as the second player. Then, drop the desired items on the floor to allow the new character to pick them up. Equip everything and sell off things that are not needed. Then, save the game and restart the Xbox. Play a new game with a new character and load the other new character (that has all the items) as the main character.

## Gamecube Cheat Guide

### **Easy money:**

This trick can be used at any point in the game. Save the game near a shop. Drop all your expensive items, then load your saved character to the same location. After the loading screen, pick up all your items and sell them. Do this again in the exact same order. You will get a lot of money.

Use the "Duplicate Items" trick with your most expensive item or weapon. Keep duplicating it until you cannot hold anymore. Sell the duplicates and buy the most expensive weapon you can afford. Duplicate these even more expensive weapons and sell them back. Keep doing this to build an unlimited amount of gold. It gets easier when you can afford the more expensive weapons.

### **Easy experience:**

Note: You must constantly save your game in order to do this trick. At any time when you encounter a Boss, immediately save the game to a new file after defeating them. Press Start and load the game file that was saved immediately before you fought the Boss. After the game has loaded, press Start and go to "Characters". Import the character from the file that was saved when you defeated the Boss. You will now have a character with more experience, but will be able to fight the Boss again which results in lots of experience. Keep doing this every time you defeat the Boss to gain levels faster.

Resurrection in multi-player mode:

If a player dies during multi-player mode, have the surviving player go the previous save point. Walk in the light surrounding the save point and they will be brought back. The character will be resurrected with all items, but at half hit points.

### **Play as Drizzt:**

Successfully complete the game under the extreme difficulty setting.

### **Sorcerer supermodel:**

Choose the Elven Sorcerer, then talk to the bar owner and finish. When you are done, go to the menu and remove her clothes to see her in her underwear.

### **Start with Onyx Sword:**

After you have completed the game once and have saved the game with the Onyx Sword in your possession (for example, with the human), start a new game with a new character (for example, the dwarf) and save. Import the human, drop the Onyx Sword and any other good items, then import the dwarf and pick them up. Note you can do this with any character and any weapon.

### **Plant Electrocution 2: "All Weapons" and "Unlimited Ammo" cheat:**

You will start the Plant Electrocution 2 level by sliding down towards some holes in the ground. The second hole is not fatal. Fall into it and glide (to avoid minor damage). You will see a lit area. Glide down there and pick up the item you find inside. Use the grapnel to exit, jump out of the hole, and finish the slide. The item you picked up should be the key to the door right beside the vines behind the glass. Go inside and fight one of the "Plant Men". You will find an envelope that has a "C" on it in the room. When you finish the game, you can activate this cheat for all weapons and unlimited ammunition.

### **SWAT Chase: "Infinite Special Move Bar" cheat:**

You will enter the elevator shaft. Ride the elevator all the way down until it stops. Get off the elevator and wait for it to rise again. After it rises, jump down to the bottom and use first person mode to find the control box. Use a Batarang to disable it and the door behind it will open. Stay clear of the elevator and wait for the correct time to get in the open room. Inside the room is "Secret Key 2." Get out of the room and ride the elevator up to the top. At the top

### **Flag trial:**

You have to have at least one or two of these weapons: the Helicopter and Guns, and the Vacuum. Hurry and find the Vacuum in one of the weapon bins. Go straight to the Winner's (or Flag) Circle and wait for whoever gets all four flags to arrive at the circle. Once they are close enough, just vacuum them up. That weapon will not only take their Flags, but also their weapon. After doing so, go to the "Victory Ring". When you have the Helicopter and Guns weapon, just after the lone Flags first, then take out any one else who has the last desired Flag(s) you need. Next quickly go to the "Ring", because you have a limited time with that weapon. Use the Helicopter And Guns to take out any one who has the Flags, and easily fly to the goal.

### Play in Expert Mode

To play in expert mode (no arrow indicators, no destination indicators) hold in L, R, and Start before the Character Selection screen appears. If done properly the word "Expert" will appear on the screen.

### Secret Push Bike:

Hold L + R at the character selection screen. Release L, then release R. Hold L + R again, then release them simultaneously. Then, press A. A ringing sound will confirm correct code entry, and your character will mount the bicycle.

### Unlock Bike:

This cheat can be done on arcade, original, or crazy box mode. At the select a character screen, press L+R,L+R, and then L+R again. Begin play and your driver will be on a bike instead of taxi cab.

### Hint:

#### Flip over trucks and buses:

Go to the highway in arcade mode and drive on the high lane. Then, knock a truck that says "wow" off the high lane onto the low lane into a truck or bus.

#### Hint: Jack knife trucks:

To make 18 wheelers jack knife on the highway, ram them between the cab and the trailer.

#### Derail train:

When in original mode or arcade mode, go to the train station and wait for a train. When one approaches, drive in front of it. The front car of the train will move off the tracks and start honking and try to move. Stay there and eventually the front car will fly off the tracks and will

remain that way for a little while.

**More money:**

Your passenger will get excited and give you more money when you pass other drivers on the road.

When taking people on the freeway, weave in and out of buses, trucks, and cars. Your passenger will get excited and give you tips. Be careful not to crash.

Sometimes when you have a customer, you can go against a wall or a solid straight side and ram side by side against it. If done correctly, you can get a Crazy Drift combo even if you did not do one. You can get up to an 8-combo. This works well by KFC with Gus or B.D Joe.

**Get to first place:**

Start the game with your fastest character and shift into reverse gear. Reverse all the way until you reach a passenger. When you have collected her, stay to the center of the road (so that you get more combos for Crazy Through). When you get to the rail car station at the top of the hill, go anyway you want (preferably straight down the middle). Try to stay to the center of the road. Go as fast as you can without crashing into any of the other vehicles. When you get to the bottom of the hill, drop off the passenger. After that, pick up any Red, Orange or (if desired) the Yellow. This will allow you to increase your time, passengers, and money.

**Crazy Box mode:**

To complete the 30 times level, drive down the middle of the road at a relatively slow speed.

**Crazy Box: Crazy Jump:**

In the Crazy Jump, start off with a Crazy Dash. When you get to the middle of the ramp perform a Crazy Dash again and once again before leaving the ramp. This result in over three hundred and high two hundreds.

**Crazy Box: Crazy Pole:**

In Crazy Pole, do a Crazy Drift to hit the pole. This will allow you to stop in both destination points of each person.

**Crazy Box: Crazy Parking:**

In Crazy Box mode; complete the following levels to receive the bonus: 1-2, 2-2, and 3-2.

**Crazy Speed:**

Press Reverse then press Drive very fast. If done correctly, your car will speed off very fast.

**Crazy Dash:**

Press Drive + Accelerate.

**Crazy Stop:**

Press Reverse + Brake.

**Crazy Drift:**

Press Left or Right while shifting into Reverse then into Drive while driving at a high rate of speed.

**Crazy Drift Stop:**

Do a Crazy Stop immediately after a Crazy Drift.

**Extra time:**

Select arcade mode and ten minutes for the time limit. Pick up a customer, then go under the water and remain there for two minutes. You will get ten extra minutes.

**\$99,999:**

Execute a Crazy Drift, wait until you have spun 180 degrees, then press Reverse + Drive. You can earn as much as a 450 combo and \$99,999.

### **Hidden customers:**

Drive off the freeway (with the high and low lanes) and go past the police station. Take the first right, then take the first left. On the next right there is a ramp. Drive up it and to get on the roof of a building with a customer.

Enable the "Another day mode" code, then begin the game in original mode. There is a hidden customer in the water by the pier.

There is a subway station downtown. Get in by driving down the stairs to find a customer that wants to be taken to another subway station. Just follow the railroad to the next station (the destination may vary) to get some extra cash. Try not to crash, because it will take a lot of time to get back on your way.

A hidden customer is near the parking structure. Drive up the ramp and slowly fall off the end of the structure on the far left side. You will see a green customer on the roof of the building you just landed on. Pick him up. He wants to go 2000 yards and will pay \$975 to go to the police station.

### **Strange customers:**

Drive down to the beach and into the water in arcade mode. In there are about three or four customers that usually want to go to Pizza Hut. Watch them closely when they hop in and out of the car -- they have unusually big ears.

### **Find the highway easily:**

Follow the big blue bus to get to the highway

### **Unlock the Pedal Bike**

You can do any of these variations for the trick to work. #1, however, is the only way to permanently unlock the bike.

Way #1) The main way to do this is to successfully complete all sixteen Crazy Box levels. This unlocks the secret bike, which can be used in arcade, original, and crazy box mode.

Way #2) While at the character selection screen, hold L + R. First release L, then release R. Again, hold L + R, then release both at the same time. Next, press A. If done correctly, you will now be riding a bicycle.

Way #3) Highlight a driver at the "choose your character" screen and press L + R, L + R, L + R, then hold L + R + Up and choose your driver. NOTE: Make sure you're holding straight up. Diagonal does not work.

Way #4) If you want to unlock the push bike in "Another Day" mode, first choose original mode. Then press R + L, R + L, R + L, R, R + A at the character selection area

#### **In-Flight Mechanic:**

In some levels there are little tank-like units that remain stationary. These are the units that shoot out the lightning and repair structures. They cannot move on their own, but you can pick them up to place them anywhere and they will slowly repair any nearby units or structures. If you pick one up and fly around with it, whenever you take on damage it will fix your ship. Be careful though, because any enemies that may shoot at you from below could hit it, and they cannot repair themselves. However, sometimes it better to leave them near your base so they will repair things as needed.

#### **In-Flight Artillery:**

If you need a little extra firepower for your ship, look for a tank and pick it up. As long as you are holding the tank, it will act like a rotating turret for your ship and fire upon any enemy units that get within its range. The tank's cannons will rotate 360 degrees so it can attack enemies all around you. This is very useful if you do not want to deal with having to make constant maneuvers to avoid being hit by an enemy that is tailing you.

## Dragons Lair 3D

### **The Impossible Room:**

This level is not really that difficult. Remember -- everything is a mirror reflection of the rooms that seem upside down while you are looking up. Get familiar with the behavior of the room and knock it out. However, the difficult part is figuring the locations of the other rooms to get out of this room. The first two are easy because you stumble across them. When you get the Dragon's Eye (so you can see hidden doors), look for an eyeball on the wall. When you see it, use your Dragon's Eye to find the opening. There are only two hidden rooms in the Impossible Room. Look carefully -- one room has bonus items you need. The second room takes you to the Lizard King. When you get the Dragon's Skin (armor against fire), fall down the hole that has fire billowing up on the bottom floor. This will end the Impossible Room and will take you deeper into the castle (Lava Level).

### **Pinball level:**

On the Pinball level where you are avoiding the balls going back and forth, jump if the side-to-side pinball is approaching you. This way, Dirk will not slow down and you can avoid getting hit by the big black ball following you.

### **The Dragon's Lair:**

When the dragon tries to light you on fire with his mouth, run close and opposite to where the it opens its mouth. Once the dragon has completed with its fiery salvo, run out of his claws reach and face him. The dragon will then directly shoot out the flame that you have to catch with your magical sword (press Guard). Press Attack to release the fire from the sword to cause the dragon pain. Once the dragon is vulnerable, slash it with your sword once or twice. Run out of its way when it recuperates. The process will start again about five times. During the second bout, he will fire two salvos. You can then catch the fire with your sword. During the third bout he will fire three salvos. You can then catch the fire with your sword and so on.

### **Defeating Mordroc:**

In the first part, the key to defeating Mordroc is to use the "green arrow" that is located in your inventory (press Start). Select the green arrow and lock on to Mordroc. Fire the bow with the green arrow five more times. You have to replenish your green arrow one at a time by killing the mini-black dragons that Mordroc fires at you. Keep collecting the green arrows and make sure to lock on to Mordroc.

In the second part, once Mordroc goes down upon his knees, he changes into a Black Singe. All of your elements are taken by Mordroc and you are going to have to fight the old-fashioned way. He flies around shooting lightning bolts from his mouth. Run away every time you see the electricity forming around his mouth. Get into your guard stance when you do not see the electric bolts forming around his mouth. In another words, Mordroc the Dragon shoots out a ball of electricity (instead of the stream of electricity), and you have to catch it by being in your guard stance. Once your sword catches the bolt, release the bolt and use it against Mordroc. Once Mordroc the Dragon falls to the ground, run up to him and strike his stomach with the sword. The process then repeats. Remember to keep a close eye on his mouth -- electricity forming around the mouth is bad and no electricity around the mouth is good. Do this five times and enjoy the ending sequence

## Finding Nemo

### Tip for Level 7 (submarine)

OK, you made it this far, and you might be stuck on something. While you think about that, try doing something else. Do a bonus thing. In this case, it's the pebble game. You know, where you have to match the red, blue, and green pebbles to their bowl thingies. Here's the tip. After you run away from Bruce twice, There are a couple broiler rooms. (After you run away from him once, there is only one broiler room.) There is the first room, there are NO pebbles in that room. The second room is different. Right when you enter that room go low towards the ground. You should see the red bowl. Ignore that for now, but remember that now. Explore a little bit more, and you will find the green pebble. Carry it until you find the green bowl. (There should be the red and blue pebbles there also.) Drop the green pebble in the bowl, the pick up the red one.

Now go back to the beginning of the room, and remember that red bowl? Well, find that, and drop the red pebble in. Go back to the green bowl, and pick up the blue pebble. The blue bowl isn't until the next broiler room. The blue bowl is at the top of the ceiling, in the next broiler room. Explore to find it. Well, that's it! You should get a starfish for your hard work.

## Gladius

### The Games at Caltha

When you start the game and pick Valens you find yourself in Imperia fighting in some leagues or what have you. then you find that your tactics aren't working so well when you play. That's when you head over in to Caltha. Ya know the big Imperial stadium. Once there you can watch fights among other gladiators and watch to understand some new strategy tactics that will help in the future. Good Luck! Also for winning efficiently in the games outside of Caltha, i suggest any one who plays the game immediately hire a Murmillo (the fish people) for they have really strong abilities.

### Fast Gold

In the beginning of the game it costs like 1000 to 3000 to recruit a new character....if you recruit someone go to the school list remove their armor and expel them you can usually sell their armor for anywhere from 9000 to 19000 making... well alot of gold if the process is repeated

### Easy earned equipment

Ok first thing to do for this trick is to head to the beach when you are in Imperia. When on the beach toward the south just stand on the beach and press the "A" button. It may take some time to find some items but keep searching. these items you find on the beach can be sold for very high prices and may be equipped to your gladiator. Good luck!

### Undead Legionaire Cash Machine!

After you get the ability to raise undead legionaires, raise strip and expel them over and over until you have stockpiled enough equipment to make your fortune. In imperia alone if you do this around ten times it's worth at least a 100,000 coins.

## Hitman 2: Silent Assassin

### Animals:

When at your home area with the shed of guns, you may shoot down the birds either on the ground or while they fly in the air. Each bird that is shot will fall to its corresponding area and remain there until you leave the level. You can also shoot the pigs in their pen.

### Pick locks quicker:

Pick a lock, look at your map, and exit. The lock will be picked.

### Fast kills:

When playing in any level, just run or sneak up to an enemy and fight him with your fists. He will soon be out cold. Once he is, use any gun to shoot him anywhere on his body. He will not get back up.

### Running knife attack:

Change to first person view and use the knife. You can attack while running if you press the Attack many times

### Getting the M4 (M16):

On the motorcade level, you need to clear the town quickly and grab the supplied rifle. Shoot your target. This will cause the UN guards to stop and run on foot to your position. Wait until they get through the gates, then dodge their shots and put them in the cross fire from the remaining troops outside. Since you cannot hurt them, do not shoot. They will soon shoot their own men. Then, just run up and grab an M4. This may not be easy, but it does work.

### Getting the .22SD pistol:

The .22SD is well hidden in the castle level where you have to kill Hayamoto senior. It is one of the items that is displayed in his museum.

The .22SD does not trigger metal detectors. It is useful in the Basement Killing level.

### Holstered Uzi:

When holding the Uzi, take out the Ballers. The Uzi will be fully holstered, like a pistol

### Silenced ballers gun:

Successfully complete a level with a "Silent Assassin" rank.

### Sawed-off shotgun:

Successfully complete a level with a "Silent Assassin" rank twice.

### M4:

Successfully complete five levels with a "Silent Assassin" rank to get the M4. Alternately, complete the Shogun Showdown level with a "Silent Assassin" rank.

To get the M4 easier, just use the fiber wire on the UN guards.

### Silent Assassin ranks:

You can still get a "Silent Assassin" rank on a mission if you are spotted. To get a "Silent Assassin" rank, there has to be nothing in the aggression bar. You can make sure of this by only using chloroform on guards and eliminating the target with just one shot

### More ammunition:

If you are near a stack of ammunition but are notified by the game that you cannot pick it up, use the following trick to get almost twice as much normal ammunition. For example, if you have a shotgun with full ammunition and are next to a pile of shotgun ammunition, fire one shot, reload, then pick up the ammunition. You will now have almost double the ammunition

### **More Bottles in Ocarina of Time**

In The Legend of Zelda: Ocarina of Time, to get more bottles first equip a bottle, in one of the slots.

Then go and find something to put in a bottle (i.e.: Fairie, Bug, Fish, or anything else you can think of!). Now, hit the Button the bottle is in to catch the thing and hit start directly after hitting the button.

Now select an item you do not want (Claim Check is good to use after you get the Biggoron's Sword) and equip it where the bottle you were catching something with was.

Press start again and you will see Link still catching the item.

Now you have an extra bottle.

You can have 24 bottles, but then you would not have any sub items!

~\*!(Note: DO NOT SAVE AFTER DOING THIS OTHERWISE YOU CAN NOT GET YOUR "WEAPONS" OR "STUFF" BACK!)\*~

## Lost Kingdoms

### **Control loading screen:**

Use the Analog-stick to move the text on the loading screen.  
Information in this section was contributed by wibcy.

### **Easy experience:**

To get experience early in the game, complete the first two stages (the starting castle plus the training stage). You should now gain access to the Apothecary and Blessoon. Go to the Apothecary and talk to Guru. After speaking with her, Dahl-Nok Valley will become available. Go to Dahl-Nok Valley and go to the right. There should be bee hives there. Select them to fight the Giant Bees. To kill them easily, send out your Man Trap. Have it attack the Bee once, then call it back. Finish off the bee with any desired character to gain the experience. Note: Bees cannot be captured. Each time you kill a Bee, you should gain about 100 to 140 experience. After killing about three Bees, return to the main map then go back and repeat until you get the desired amount of experience.

### **Easy money:**

A very easy way to gain money early in the game is to go to Blessoon as soon as it becomes available. Catching most of the creatures and selling them will give you more than enough money. The easiest way to get money is to catch and sell the Rats. You will get about 40 gold per rat sold to the Apothecary. The most expensive card, the Guro only costs about 210 gold

## Lost Kingdoms II

### **Good ending:**

Defeat the unknown men and get the Stone of Sealing before you go to the castle and fight with Sol. Defeat the Body of God for the second time in the Royal Tower to view the ending.

### **Play as Helina from first Lost Kingdoms in Vs:**

Defeat the neutral element boss monster in the scared arena (2nd Area) and rather than returning to the beginning continue west to another battle arena. Fight Helina in this arena and defeat her. You must have a skill level of 6 or higher in neutral ability and have defeated the 1st battle arena bosses and the unknown man blocking the arena exit (or if second time or more an extra kendarie knight). This can be done at any time during the game. Defeat her and she appears in the character roster in vs. mode

### **Play as Katia in Vs. and Download cards from LK:**

After you defeat Thalnos in the Scared Battle Arena 2, head north to another arena. Fight Katia and beat her. When you win, the "official" mission will end and it will automatically take you back to the world map. At this point before you can do anything, it will ask you if you want to "Take on Katia's responsibilities". This message is asking you if you want to download your card collection from the original Lost Kingdoms and add it to your current collection (this is the only time that you can do this action for the save file). If you want to, select ok then yes. In any case, save your game and when you load up the file in vs. mode, Katia will appear on the character roster.

### **Play as Kendarie Warrior In Vs. Mode:**

Defeat the Kendarie Card Master Boss (not the lower Kendarie Knights) in the Kendarie Fortress in the first region. Save your game and when you load it again in vs. the Kendarie Warrior becomes available for choosing.

### **Play as Rashiannu in Vs. Mode:**

Beat the Royal Tower Upper Level (This final normal stage for single player mode). Then let the game save the completion settings. When you load up that data in vs. mode, Rashiannu will be available in the character roster.

### **Play as Thalnos from Lost Kingdoms in Vs:**

After you beat Helena and Leod in the Scared Battle Arena 2 (you can only fight Leod here after you beat the game), go to the northern most door in the area and go in. Fight Thalnos and after you beat him save your game. When you load this data in vs. mode, Thalnos will appear on the character roster.

### **Play as Urbur Cultist in vs. mode:**

Defeat one of the cultists that you encounter in battle (most likely, the first one you'll meet is in Ruldo Forest, but any will do), then complete or abort the stage you're on. Save your game and when you load your file in vs. mode, the Urbur Cultist will be available to play (the character is marked as "unknown" on the list).

### **Duplicate any card**

To accomplish this trick, you must have two separate saved games. You can't just save to a different file or memory card. Start a new game, abort the first mission, and save your progress in a separate file.

Now go to the VS mode and load your primary game (the one you want to copy your cards to) for player 1, and your new game for player 2. Wager whatever cards you want to duplicate, then lose to player 2. Load your new game, then save that game in however many slots you want (don't overwrite your primary game!) Go back to VS mode and load your primary game as player 1, and whichever copy of your new game as player 2. Win as player 1, and take back your cards, then go through all the duplicate new games, making wagers of whatever cards you want duplicated. This even works with the very expensive capture card!

## Luigi's Mansion

### Another Mansion (Ura-Yashiki) Mode

Rescue Mario and finish the game once. You will get ranked according to how you did and receive a letter grade. Save your game. You now have the option to restart Luigi's two ways (in addition to going to the completed Gallery). The first option lets you go back to the regular Luigi's Mansion Mode. The second option, called Ura-Yashiki (Another Mansion) in Japanese, lets you restart the game -- and presumably some of the things in the mansion have been changed around

### Secret Treasure Rooms

The first one is located on the first floor, in the south-west corner of the Mansion. After you have sucked in the candle-carrying butler, examine the room with your Game Boy Horror to find a mouse hole. Press A to activate it and go inside to enter the treasure room.

The second treasure room is accessible from the roof top. Use the elevator in the toy chamber to get on the roof, then go all the way to the right and climb up on the chimney. Fall down and you will land in another treasure room

### Water The Plant

Go to the right side of the graveyard. just underneath the balcony with toad. There is a seed. Once you can use water (BEFORE the second boss) water the seed. enter the doghouse, and defeat the second boss. return to seed and water again. continue with game, but come back and water it after you fight the 3rd boss. It will bloom and produce a diamond

### Mice for money !

If you are looking to get an 'A' grade you need to find all the golden mice. To find the mice, go into 1st person mode with the gameboy horror and click onto hidden cheeses with the A button. These cheeses can be found in:

The second floor study behind a desk.

The first floor dining room underneath a chair.

The second floor dining room at the back.

The first floor room with the crystal ball behind the fortune teller.

The third floor trophy room behind a chair.

The second floor corridor near the stairs to the attic, you hear a chime and a mouse runs up the corridor. (You do not need to find cheese for this one).

As soon as you click on a cheese a mouse appears, go back to third person view and suck up that mouse quick for much cash and the occasional gem.

The mice can only be caught before the lights come on in any room. So get the mouse and then the ghosts. If you miss the cheeses the first time around; after the third boss when the lightning trips the power and the mansion is in darkness again, go mouse hunting, although in some rooms now there are loads of ghosts, so it's not so easy as it was first time round.

### In-game reset:

Hold B + X and press Start while playing.

### Unlock Another Mansion and gallery mode:

Finish the game and save.

### Shortcut to the main/lobby of the mansion:

Switch to your Game Boy Horror's first person mode and examine any mirror in the mansion with A. After a really trippy warp sequence, you will find yourself in the entrance hall of Luigi's Mansion

## Gamecube Cheat Guide

### **Receiving tip:**

### **700+ Madden Card Points:**

In the two minute drill go into a team and alter all of the defensive characteristics to 15 points (this is as low as you can go). After this is done, select to play against that team in the 2 minute drill, then pick a good team of your own to play with. During the two minute drill select a running play, toss or sweep, and keep running the ball into the endzone. Running plays gives you more points than passing. After you score a touchdown use a two point conversion to gain extra points. Using this you should be able to score 96 points on the Madden level to get over 700 points to use to buy cards

### **Memorycard trick**

You know how on GameCube version of Madden 2004 it take up alot of Blocks, we'll if you have two memorycards that would together equal the amount needed in the game, put on in the save some of the info and another one to save another aspect of the game, and then when you play put the correct card (that has what you are trying to load) and then after its loaded take it out and then load the rest off the other card and play!

### **No Cap in Started Franchise**

To turn off the cap in a franchise you already have started get your team extremely close to the salary cap (100k to 0k works for me) but you have to be missing a player you need (ex. have only 4 WR) then try to go to a regular or pre-season game it will say something to the effect of "You need a WR" then give you a choice to sign one or have the CPU sign it, choose CPU. Then it will pause for a second and say "no cap room choose cancel to sign player yourself or choose ok to turn off salary cap permanently. "Its that simple warning though this will turn off owner mode for good

### **Help Lower Salary Cap (in franchise mode)**

To help lower the salary cap, when you sign people sign them for 7 years and raise the signing bonus, it will raise your cap until a certain point then will lower it, raise it to the point when it gives you the most cap and there ya go as Madden himself would say BOOM

### **Do you have a low salary?**

If you have a low salary and need to sign in new players don't turn your salary cap off. Because if you do you won't get Owner Mode. One thing you can do is that the computer automatically puts what the player wants in other mode how much money he wants lower it put the signing bones up. Sometimes the player will reject but keep on putting it up by 10k and soon enough he will accept lower than what he was asking for. (while you put salary up little by little put signing bones to it's max they like signing bones to it's max)

### ***Bargain Basement Superstars (Franchise Mode)***

Create a player without increasing any of his attributes. You can even lower them a little more to make his price as low as possible. Sign him for 7 years for next to nothing, then go back into create a player and increase his attributes to whatever you want them to be without raising salary. You can even max them out, but how much fun would that be?

### A Chance Meeting: Falling objects:

When you enter the main U-boat facility and start to fight your way towards the docks, you will encounter several train cars. One of these cars has a mounted MG-44. Hit the switch on the other side of the car and it will roll until the gun is pointing through a doorway leading into an

open area between the dockyard buildings. Use the gun to clear out the enemy. When done, proceed forward until you find more Nazis. One of them will shoot at you with another machine gun mounted on a sandbagged position. Behind that are a truck full of torpedoes and a crane that is holding several crates aloft. Use your Springfield sniper rifle and shoot the rope. The crates will fall on the truck, causing it to explode and kill the sniper on the crane and any nearby Nazis.

### **Clipping Their Wings: Hidden chests:**

On the final mission where you are required to take pictures of the blueprints, there is a sleeping area. On the side of the room where you find the spy camera, check in between the bunks to find hidden chests. You will find canteens inside.

### **Derailed: Secret passage:**

As you start the mission, go to your right and you will see a dirt road. Go slow because of a Nazi that is sitting down, waiting. You see something in the mountain. Go to the door but do not open it. Get ready to shoot -- there are three Nazis inside. Mow them down and grab the MG-42. Then, wipe out the remaining Nazis below.

### **Nijmegen Bridge: Destroy the AA gun:**

At the end of the level, you will see a red barrel with a white rag sticking out of it that must be destroyed. Use the following trick instead of shooting the barrel or tossing a grenade to detonate it. Approach the side of the barrel with the rag. You should see the message "Press Action to ignite the rag" appear at the top of the screen. Do so, and you will hear the sound of Jimmy lighting a lighter and touching it to the rag. Immediately back away and wait. After a few seconds, the barrel will explode and the anti-aircraft gun will be destroyed without wasting any ammunition.

### **Nijmegen Bridge: Suicidal Nazi:**

When instructed climb up the ladder to top of bridge, do so. Note: Enable the "Invincibility" or "Bullet shield mode" codes to make this easier. When you reach the top of the ladder, a Nazi will be directly in front of you. He will aim his gun at you and begin to shake. Do not shoot him or any other Nazis. Wait for a moment, and he will stand up, grab his helmet, and jump off the top of the bridge screaming.

### **Omaha Beach: Saving your men:**

When you get out of the water, quickly get to an obstacle, then find the Higgins Boat where your lieutenant is located. Saving your men is difficult because cannot see very far. The will not wave at you unless you are close to them. Once you run up and down the beach a few times, you will hear them over the noise.

### **On Track: UFO:**

When you get outdoors next to Sturmgeist's train, look up and to the right. You will see a UFO flying in the air. If you look closely, it has the Nazi markings and colors.

### **On Track: Jimmy Patterson poster:**

When you get to the entrance to the train station, stop and look on the left side of the entrance door. There will be a wanted poster of Jimmy Patterson with a picture. It even has a reward in German.

### **On Track: Drunk Nazi:**

You will find a bar just before the first trains. The first person you should see is a Nazi with a mug walking around the room. Do not shoot him. Shoot the others with guns. After you kill the ones with guns, you can see the drunk Nazi lie down and go to sleep on the floor, using his mug as a pillow.

### **Operation Repunzel: Suicidal Nazi:**

There is a Nazi soldier practicing a speech in a hall where you find the map behind the painting. Instead of going around on the top, go downstairs and run up to him. He will automatically fall back and die without a single shot. The only downside is that you cannot get a gold star for this mission if this is done.

**Operation Repunzel: Extra health:**

After you kill all the waiters and the cook, look around and run to the bread. Jimmy will say that its yummy , and your health will rise more than a medical canteen.

**Operation Repunzel: Speech practice:**

You will encounter a man practicing his speech in a large hall inside the building where they are preparing to have a Nazi Rally. Instead of walking up to him, stay on the balcony and go across the walkway connecting the two sides of the room. He will see you and tell you to stop. He will then pick up the rocket launcher next to the podium and fire it at you. It will hit the walkway and blow it in half, forming a ramp from the ground floor to the upper level.

**Operation Repunzel: Chandelier kill:**

You can shoot the chandeliers that are around in some of the rooms of the Nazi building. They will kill anyone underneath, including you.

**Rough Landing: Sniping Nazis:**

After Barnes blows up the tank that is inside a barn, you will get to a mill where you will find a sniper. Kill him, then get up to the mill. Snipe the large group of Nazis that will appear in the distance, as if they were following you.

**Seaside Stowaway: Breach wall to the docks:**

You will see a red barrel with a white rag sticking out of it that must be destroyed. Use the following trick instead of shooting the barrel or tossing a grenade to detonate it. Approach the side of the barrel with the rag. You should see the message "Press Action to ignite the rag" appear at the top of the screen. Do so, and you will hear the sound of Jimmy lighting a lighter and touching it to the rag. Immediately back away and wait. After a few seconds, the barrel will explode and the dock wall will be breached without wasting any ammunition.

**Yard By Yard: Civilian backup:**

In one of the alleys, you will encounter an old women just sitting in her backyard. Next door to her lives a young man with glasses, lying on his lawn next to his shed. In his yard is a ladder propped up on a couple of boxes. Use this ladder as a ramp and walk across it. In this yard is a man with a helmet standing next to his shed. Do not shoot him. Walk up closely to him and he should have his arms raised, is clearly too old to be in the military. Stare at him until he puts his arms down and reaches into his shed window for a shotgun. Still, do not shoot him. By this time a Nazi soldier will storm into the man's yard. The old man will fire at him, killing him, and leave his yard looking for more Nazis. For good measure, stand as close to him as possible while he leaves his yard. He will give you a nudge to go while he covers you.

**Yard By Yard: Create hole:**

Shoot the dirt with a Panzerschreck and the man will sink down into a hole.

**Yard By Yard: Flush the toilet:**

At the beginning of the mission in the first house you enter, go up the stairs to find a bathroom. Press Action here and Jimmy will flush the toilet.

**Your Finest Hour: Soldiers' names:**

After your amphibious boat explodes, go to the shore where you will see a few dead men. Zoom in on there chest and you will see names such as Rus K (Risky) and others.

**Your Finest Hour: Fish:**

In the first mission, Your Finest Hour, walk along the beach and you can see little silver fish that have washed up on shore.

**Perfectionist Mode**

### Earning campus challenge credits and running up your score/stats:

Create your own juggernaut school/team. Edit the roster so your team is filled with studs. Enter season mode with your team and under the preseason options, schedule as many 1-AA teams as possible. Set your playing time for 15 minutes and enjoy the ride. If you have the unlimited time-out cheat, you can use it here and stop the clock after any play finishes in-bounds. This will give you more time to compile stats. Note: Doing this may increase your game time to over 90 minutes (and possibly 120) of "real-time". If you are going to use the time-out cheat, take a 15-minute break when you hit the half time point of your game. Also, note that campus challenge points are awarded based on your level of play. Heisman is the hardest level, but you also get increased value on your campus challenge credits.

### Cause fumble on kickoffs:

To to make your opponent fumble the ball on kickoffs, keep kicking to the same player. Eventually he will fatigue and start fumbling the ball in the third and fourth quarters. You can also kick to the other side of the field and try to surprise the other receiver. If you catch him off guard, he will sometimes fumble.

### Announce names instead of numbers:

If you would like to hear the announcers call out your teams names rather than their numbers, all you have to do is put their roster in. Go to the options screen, go to "Edit Rosters" and insert the names under "Player Info". After you insert them, play a game and your team's names will be announced.

To access the EA players, go to the create-a-player section and input any EA Sports personnel name, which can be found in the credits section towards the back of the instruction booklet. Most (but not all) of the names exist as hidden players, including several names from the "thanks" list, along with commentator Jim Hughson, rink announcer Jon McComb and Vancouver Canucks coach/NHL 2003 strategist Marc Crawford. If you play in franchise mode, these players will occasionally appear in the rookie draft for you to sign. Note that the female Christian names have been substituted for viable male alternatives: e.g. Susan Smith is Steve Smith, and Christine Staples is Christie Staples. You will have to experiment to work the girls out. If you can be bothered to create enough of the players, you can fill out the EA Blades and EA Storm Custom Teams with actual EA Sports players to give you a further two teams to play with.

At the created player screen, enter various names of real players that do not appear in the rosters (such as Eric Lindros). Their exact profile and face will appear.

## Gamecube Cheat Guide

Create a player using one of the following names of members of the Bare Naked Ladies: Jim Creeggan, Tyler Stewart, Steven Page, Ed Robertson, or Kevin Hearn. The game will adjust the players face and statistics automatically to match that band member.

### **Deflection shot:**

Get the puck to the offensive zone near the blue line. Hold Deflection/Short Block while shooting. One of your players will skate to the front of the net and deflect the puck in.

### **Easy goals:**

If you are skating with someone that has a very high rank in the Deke category such as Joe Sakic, Kariya, etc., once you get past the opposition's blue line, press Down, then press Auto Deke. Immediately after he is done with the Deke, press Shoot. You will score about 95% of the time.

Take any big shooter and let him take a slapshot directly in the middle of the hash marks. Shoot for the top corner. This will work about 90% of the time. If a defender is on you, once in three zone move to the left or right, then cut back left or right and take you slapshot.

Fake to the left, then Deke (Y) to the right and do a wrist shot (press B just before the end of the trick).

### **Smash players into the glass:**

Get a hard hitter such as Brenndon Shannahan. When a CPU or human player is near the glass, press Y (big hit) for a chance to break the glass with them.

### **Use NHL player's face and picture for a created player:**

When entering a name for a created player, use an existing NHL player's name. A prompt will confirm that the player is in the database and then ask if you want to create a player like him. Select "Yes" and you will receive his face type and picture for you player. You can then enter any name and stats once you have finished

The next thing you have to do is type in the Players last name and first name, and then it'll say "There is a player in the database with that name. Would you like to create a player with the same information?" This works with only the NHL 2004 roster!

### Card Cheats

### Have Ultimate Team Without Stealing Players

All you have to do is go to "my NHL" and create your own team. Pick whichever players you want to. Now when you go to "Dynasty Mode", substitute your created team for any other NHL team. Now you have the best team, and all of the members of your team are still on their original teams at the same time. But beware, if you created your own player he will still be a free agent at the start of the dynasty even though he is already on your team.

## Resident Evil 2

### Secret Film

Just like the others versions of RE2, there's a secret film that can be found in the S.T.A.R.S. Office... Just have to search the desk that says "it's trashed" about 50 times.

### Unlimited ammunition:

Begin game play then press Start to display the options screen. Select the "Button Config." option. Highlight "Aim" then hold R and press Z(10). The white boxes around "Config" and "Aim" should change to red to confirm correct code entry.

### Extreme battle mode:

Complete both of either character's scenarios with an "A" rank, then go to the "Special" option. A new "Extreme battle mode" selection will be unlocked.

### Play as Hunk:

Complete both of either character's scenarios with an "A" rank.

### Play as Tofu:

Complete both of either character's scenarios with an "A" rank, and Hunk's scenario with any rank.

### Play as Ada Wong in extreme battle mode:

Complete extreme battle mode level 1 as any character.

### Play as Chris Redfield in extreme battle mode:

Complete extreme battle mode level 2 as any character.

### Alternate uniforms:

Start a new game with Leon and choose your settings to: red blood color and normal difficulty. Begin the game, and advance past the opening sequence. Do not pick up any items and try to avoid using your handgun bullets (you only really need them for the zombies in the bus and the zombie with the key - avoid the rest of the zombies). Get to the police station gate and go to the lower level stairwell. Outside you should see Brad Vickers (from Resident Evil 1 and 3) as a zombie. Use the rest of your clip on him. If he is still standing after that, run into the police station and get the handgun bullets on the desk near the computer, then go back outside and finish him off. Check his body to find a Special Key which will allow you to change clothes in the Dark Room (where you develop film). Leon has a leather jacket with skull emblem and an old S.T.A.R.S uniform with a baseball hat and Claire has a leather suit with a fast firing pistol called the Colt SAA. Another way to kill the zombie easily is to go up close and shoot his legs to make him fall forward, Then allow him bite your leg and you will crush his head. However, only do so if your condition is at Fine or Caution. If you get hurt by the zombie, get the herb in the garden at the top of the stairwell. This trick allows you to get the uniforms without completing either scenarios. The only difference is if you complete the game you see a short sequence that says "Do not pick up any items at the police station!".

Complete either character's first and second scenarios in less than three hours. A zombie in a uniform will appear after both missions are completed to confirm correct code entry. Load the saved game and begin the first scenario by going to the police station without collecting any items. Quickly move past the zombie that appears in the alley near the police station. Collect the shotgun, then kill the zombie. Take the special key from the zombie's body to open the lockers with alternate uniforms. Claire has a denim jacket, with a quick shooting revolver. Leon has two alternate uniforms (a leather jacket with skull emblem, or a tank top and baseball hat), one of which will allow him to shoot with one hand.

### Unlimited weapons:

Complete either character's first scenario in under 2.5 hours with an A or B ranking for the special rocket launcher. Complete either character's second scenario in under 2.5 hours with an A or B ranking for the special gatling gun. Complete either character's second scenario in under 3 hours with an A or B ranking for the special machine gun. The special weapon will

appear in the next game after the first chest is opened.

### **Shotgun or crossbow:**

When playing as Leon go to the gun shop with the man. He will almost shoot you. After he dies because of the zombies, kill them. Then go up to the dead man and press Action. You should get a shotgun. If playing as Claire you will get the crossbow.

### **Ranking system :**

To get an A ranking, beat the game in under three hours and do not use any First Aid sprays. Herbs, however, may be used. To get a B ranking, successfully complete the game in under three hours. To get a C ranking, finish the game in five to seven hours. For a D rating, finish the game in seven hours or more. Note: The rank will be lowered by one grade if any special weapons are used, or if the game was saved more than twelve times.

To get the "S" rank on mission 1, complete the game in under 1 hour 30 minutes, only use up to one green herb, do not save, and only use a knife, handgun and shotgun/bowgun or magnum/grenade launcher. I.e., if you pick up the shotgun/bowgun do not pick up the magnum/grenade launcher; or if you want the magnum/grenade launcher, do not pick up the shotgun/bowgun. Also, no weapons upgrades are allowed on any weapon and only one of each type of weapon. I.e., do not pick up the shotgun/bowgun from the dead shopkeeper then pick it up later in the game.

### **Rebecca Chambers picture:**

Walk into the S.T.A.R.S office, go to the back of the room and click on the desk with the "This desk is trashed someone must of searched it" description. Search the desk fifty times to find a photo of Rebecca Chambers as a basketball player.

### **Shoot the screen:**

While playing Leon's scenario, take the unlimited ammunition shotgun and go to the roof where the helicopter crashed. Stand near the door leading inside, and make sure that a close-up view of Leon appears. Aim the shotgun at the screen and fire. Bullet holes will appear. Note: This may also be done at any location where Leon can aim at the screen with the shotgun.

Another way to do this is when Leon in the gun shop after the zombies killed the man. Get the shot gun from him and go to the bus that has crashed. Make sure you do not use the shot gun while going to the bus. Once inside the bus, kill the two zombies (on the floor and walking). Go to the back of the bus, where Leon entered, and aim at the screen.

In the first scenario as Claire, you can shoot the screen in the hall where the S.T.A.R.S. room is located (where you get the fax). It is not in that room, but it is in that hallway. Keep trying until you get it.

As Hunk in the green crow hall where you fight the second Tyrant, go around the second corner in that room. As you shoot at the Tyrant with a shotgun it will shoot the screen.

This ammo is more powerful, may have slightly different effects, and once loaded into a weapon will change it into an "enhanced weapon". You can only create two types of enhanced ammo: 9mm handgun bullets and shot gun shells. The only different effects the new bullets have is that they are far more powerful.

### **Attack a Sim:**

Insult a neighbor or your roommate until their name is down to -100. Then, go outside and display the action options (where you can choose to kiss, hug, insult, slap). You should now be able to attack the person. Do this about three times. Your roommate will have had enough and pack up and leave for good.

### **Alien abduction:**

Buy the telescope and use it for too long. Your Sim will be abducted and disappear. It will reappear some hours later, with different stats.

### **Easy money:**

Enable the "Free mode" code, then go to your house and buy a lot of expensive items. After that, save then restart your system. Do not enter the code again, then sell your items back for more money. The best item to do this with is the Monkey Butler Tree, which is worth 15,000 Simoleans.

Enable the "Free mode" code, then move your Sims into the cheapest house available. Then, buy a lot of expensive items (such as the Monkey Butler). After this, evict your Sims from that house, but do not empty the house. By doing this, your Sims keep the "assets" that they had, which turn into money for them. The house will then cost something similar to 99,999 Simoleans. To counter this, enter build mode for the house you moved your Sims out of, then sell off the Monkey Butler and other items you put up. The house will be cheap again. Move your Sims back in and they will have a lot of money.

Enable the "Free mode" code, start a game, and buy fifteen Heart Hot Tubs. Note: These must be unlocked in Get A Life mode first. After buying them, save the game and quit. Turn off the PlayStation2 to disable the code. Return to the same game and sell all the Heart Hot Tubs that were bought to get up to 99,999 Simoleans. Notice that when you pay bills, buy something, etc., your money will not decrease.

Buy a workbench and heighten your Mechanical, Creativity, and Body. Keep making Gnomes. If you have a very high status, you should be able to sell each gnome for at least 100 Simoleans. Making gnomes only take about one to two seconds each if you have a very high status.

Have a Sim with a high creative level. Start a painting or a sculpture. After it has been started, tell that Sim to stop, then have another Sim (with no creative points) finish it. Sell it, and you will still get as much money as you would if the Sim that originally started it had also finished it. You can even have your kids finish your painting and still get as much as if the parent did the painting.

### **Easy skills:**

Evict a family. When this happens, their moods go up immediately after you move into another house. Once you get in a house, study, work out, etc.

If your energy or any other stats get low, evict yourself from the house. Reenter the house and all your stats will be renewed.

### **Getting married:**

To get married easily, invite a Sim of the opposite sex. But first, always throw a party and pick the Sim you want to marry. "Greet" them, "Talk" to them, then when they want to leave you will know their phone number. After dark, call that person. "Invite" them over. If they say "Sure", wait for them. Get to know them more. When you get the chance to "Flirt" with them, do so. Sooner or later she or he will fall in love with you. The next day (or perhaps on same day), get your Sim in a good mood (three green bars or more). Then, "Serve Dinner (Lunch, etc.)". When they are done eating as much as they desire, watch television. While they are watching television, highlight your "Guest" and give them the command to "Watch TV". They will "Watch TV" with you, talk to you, and their comfort will rise. Next, "Talk" with them, "Tell Jokes", "Hug", "Dance", etc. If your Sim is still in a good mood (three green bars or more), you will have the option to "Propose" to the Sim you want to marry. Sometimes they will not accept (you will hear warning sirens) and they will state a reason. Do whatever they wanted you to do. When you fulfill their requests, "Propose" again. If you are lucky, they will accept. Note: You can only do this in Play The Sims mode.

### **Keep child home from school:**

If you do not want your child to go to school and do not want to keep hearing the bus honk every few seconds, just let your child stand in the middle of the road where the bus waits everyday. Then the bus will not appear, and your child will not go to school.

### **Getting money after missing work:**

If you miss work one day, do not answer the phone. Instead, wait until the next caller, who should call in later. They will give you some money.

### **Keep Major Domo longer:**

Call Major Domo, then put a fence around his tree house after he leaves it. He will remain with you much longer, but will still eventually disappear.

### **Keep guests from leaving and improve your social status:**

Throw a party. When your guests arrive, have them go inside your house. Pause game play and enter build mode. Wherever there is a door going outside, replace it with a wall. Resume the game. Since they cannot leave, they will stay and have a raging party. You can now talk all you want with your guests and they will not leave, eventually even marrying someone. You may also want to buy some beds in case they get tired.

### **Nude Sim:**

Note: This is easiest to do in Play The Sims mode. Get a fire place, then buy a rug and place it under the fireplace. Buy the heart shaped spa. Light the fireplace, get in the spa, and wait until there is a fire. Before your Sim gets out and starts jumping around because of the fire, cancel everything but the spa. Wait until the spa burns up. If done correctly, your Sim will appear in another part of room close to the wall, and will not have their clothes on. Note: The censor will still appear.

### **Zombie Sim:**

Kill a Sim and wait for the Grim Reaper to appear. Plead for his or her life. The Grim Reaper will either ignore your plea, turn your Sim into a Zombie, or revive your Sim. If your Sim was revived, kill him or her again, then try again. The outcome is random. Note: Do not save the game if the Grim Reaper kills your Sim. Reload the game and try again. Zombie Sims do not have any features different from normal Sims other than a green color.

### **Regain needs:**

Skip work every other day, to the point where they call you but you will not get fired to regain your fun and social levels. While you are home, call over some friend(s) and play pool or a cooperative game.

You can use the Wiffer Puffer Gold to recover a certain part of your needs, such as comfort, fun, etc. according to the one you use. This is especially useful near where you read or work out.

Make a Sim touch the Bug Zapper. It gives them extra energy

**Super Sonic and Hyper Shadow:**

Successfully complete the Last Stage? Level in story mode to unlock Super Sonic and Hyper Shadow.

**Dr. Robotnik: Mystic Melody:**

At the very beginning of the Sand Ocean level, stay on the turnstile until it rotates the entire way around. At that point you will see a glow, which is the Mystic Melody. You must fly over to a new platform to get it.

**Eggman: Mystic Melody:**

In Eggman's Sand Ocean level, go onto one end of the turning platform and stay there until view changes. You will see the Mystic Melody.

**Knuckles or Rouge: Finding goals:**

At any point if you cannot seem to find what they are supposed to look for, intentionally die. You will lose all your rings, but in big stages you will find that it is to the most benefit. Note: Make sure that you have plenty of lives.

**Knuckles or Rouge: Extra lives:**

Enter two player mode and choose Knuckles or Rouge. Keep digging in the stage. After you dig you might get a lot of coins or lives. Keep digging for lives -- you can use them when you try an adventure (Dark or Hero story line).

**Knuckles: Mystic Melody:**

Go to Wild Canyon as Knuckles. Go straight into the windy gust throwing you upward. Look to the left and you should see three small buildings containing four boxes in each one. Ignore them. Go straight past them to find the Lonely Statue. Climb above the statue's head straight up and you should see a strange painting. Dig through it to find the Mystic Melody.

**Knuckles: Sunglasses:**

To get the sunglasses for Knuckles, play through story mode until you get to the Meteor Herd level. This occurs immediately after fighting the "Egg Golem". Look around for a big meteor on a separate floating rock island. Get on it, then get in back of the huge meteor, as far as you can go. Punch twice and then move forward for the Mini-Spiral Upper. If this does not work, try running at full speed and slam into the door in front of you. If it opens, break the metal box located there, then hit the button. Find a spring that takes you up to the top (or climb up), then fall down the newly opened area. You should see a rainbow-colored area with the Sunglasses power-up.

**Rogue: Treasure Scope:**

Successfully complete the Dark story line or get the Iron Boots in the Space level. Then, return to the first level and look for the Egyptian sign that was in Egg-Quarters. You will find Mystic Melody here. Then, go to the Security Hall and find the point of usage for Mystic Melody (there may be two). Follow the bridge that appears and use the Iron Boots on the crates to break them to find the Treasure Scope.

**Sonic: Extra points:**

When playing as Sonic, use the special punch attack after hitting and destroying an enemy to hit another and collect more points.

**Sonic and Shadow: Mystic Melody:**

The Mystic Melody for sonic and shadow is in their final stages. For Sonic, keep playing through the level until you see a rocket on a platform while grinding on a rail. Jump to it, and use it to go to a different route. Keep playing through this route until you get to the Mystic Melody. For Shadow, there is one part of the level where you can keep spiraling up on magnetic tubes. Eventually you will get to the Mystic Melody. The Mystic Melody is a tool every character can get. To use it, you must find those strange boxes that are in each level. Play the Mystic Melody to unlock a secret passage. The secret passage will usually lead you to the lost Chao you need to find to complete mission 3.

**Shadow vs. Sonic finale: Extra lives:**

Get 100 Rings by using Light Dashes.

**Tails: Homing Laser upgrade:**

A weapon not mentioned in the manual is the upgrade for Tails' Homing Laser. After completing the stage in which Tails earns the Volcan Upgrade, go back to Prison Lane via the level selection screen. At the end of the level, before touching the goal, look for the cameras. Shoot them down and break the iron boxes in front of the gate (if there are any). The Laser upgrade will be behind two barred doors afterwards.

**Tails: Mystic Melody:**

Get the Vulcan Cannon upgrade (which is a mandatory item that you will eventually get). Then, go to the Egyptian level and play through it until you see a door blocked by iron boxes. Shoot the boxes, go through the door, and collect the Mystic Melody.

**Tails or Eggman: Extra health:**

To gain a little health for Eggman or Tails, hit an enemy. When you see a Chaos Driver, get it. Your power bar will rise slightly higher.

**Homing Laser upgrade:**

To get the Homing Laser upgrade for the Eggwalker, on the first stage of the Dark story line, find a hall blocked by iron containers. Shoot them with your Vulcan cannon (needs to be upgraded first). You will find the homing laser upgrade at the end of the hall.

**Aquatic Mines: Air Necklace:**

Go to the Aquatic Mines level as Knuckles. Find the switch that changes the water level to its third setting. (o do this, make sure it is on the first setting and climb the pole in the center of the room. Then, jump to the pulley taking you above. Go to level 2 of the stage and find the a caution sign. Jump in the pit and keep following the path to the item. The Air Necklace allows you to breathe under water for an infinite amount of time. This is especially helpful in the very last level, where you spend virtually the entire time underwater.

**City Escape: Magic Gloves:**

Once you get the Fire Somersault Bracelet, return to the first level of Sonic's adventure (City Escape). Go towards the end of the level and look for a spot on the ground composed of four steel crates. Perform the bounce attack on top of them and you will fall into a secret room. Once there, you can bounce and destroy more crates to find the Magic Gloves. They will allow you to turn an enemy into a miniature throwable version. However, you have to get very close, making it not all that useful.

**City Escape: Run on foot:**

At the start of the City Escape level, instead of landing on the ground with the board, scrape the roads on the board. When on foot run full speed at a wall and get knocked down. Pause game play if you fall after hitting the wall. Choose to restart the level to run on foot and not on the board.

**Cosmic Wall: Extra life:**

As Dr. Robotnik. While trying to get up one of the giant holes by jumping from platform to platform, you will see two platforms extremely close together. Shoot all the boxes there to reveal a 1-up item which increases your life bar, so you can sustain more attacks before dying.

**Crazy Gadget: End of level:**

As Sonic, reach the last sequence when you hit the switch before you get the goal to launch the missile. Use the first switch then instead of using the second switch. Use the bounce attack to go higher to the red platform and move to your left. Hit the switch to go down. Step off the purple platform to find the switch. Use the bounce attack to get high enough to reach the gravity switch. Once you do, just jump to hit the switch. The next part is tricky. Use the homing attack to hit the spring near the goal and do not press anything. You should end up back where you started use the first switch to go up. Repeat the procedure, except use the

switch that is straight ahead. When you get down, fire the missile to get the goal.

### **Egg Quarters: A rank:**

To get an A rank for Rouge in Egg Quarters, get the three keys in 4:30. Usually you have to get it in 1:30.

### **Final Rush: Extra lives:**

As Sonic, after the first grinding rail, land on the first platform. Take the lower of the two rails. At the end of the rail, jump to the platform and use the only rail, on the ground. At the end of that rail, there is a platform with speed panels. At the end of the platform there is a bomb robot over another platform. Destroy it and use the rail off of the platform it was over. At the end of that rail is a check point with a small gap afterward. Jump the gap and go all the way down the big drop. At the bottom is a rail on the left side. It will take you to a platform with a ring box and a life box. Get the life and then choose "Exit" from the "Start" menu. Re-enter the level and you should have the same number of lives you had when you exited the level. Repeat this as many times as needed.

### **Hidden Base: Interesting statue:**

In the Hidden Base level as Tails, go to the pulley where, at the top, there are five to six Kiki's throwing bombs at you. In that area is a headless statue of a nude woman, holding her cleavage.

### **Hidden Base: Green sea monster Chao:**

When playing as Tails, there is a hidden green sea monster Chao in the small maze. It makes your Chao's color turn green.

### **Iron Gate: Special Dragon Animal for your Chao:**

To get A Special Dragon for the Dark story line, get all three Chao boxes in Iron Gate as Dr. Eggman. Be careful 00 one of the boxes is near the goal,

### **Iron Gate: Laser Blast:**

First, find the Cannon in the Weapons Bed level, then play the Iron Gate level again. Go to the location where you find the most coins and two gas pipes. Blast those gas pipes. You will now see a way leading to a hall. The Laser Blast is inside, glowing green light. Take it. It makes it easier to lock-on to more opponents.

### **Mad Space: Phantasy Star Online items:**

In the Mad Space level as Rouge, you can find items from Phantasy Star Online lying around -- the boxes rather not items themselves. For example, you can find green and blue boxes from the game.

### **Metal Harbor: Shortcut:**

Near the beginning as Sonic, after doing the loop-de-loop there is a robot you can home-attack, which will take you to a faster route. After completing this much faster route, simply finish the rest of the level as fast as you can without taking detours. Also try to go straight all the way on the street board at the end-- do not zig-zag.

### **Pumpkin Hill: Ghosts:**

As Knuckles, from Pumpkin Hill to the rest of the game you can find ghosts in certain places. Note: They just pop out and knock you down.

### **Pumpkin Hill: Extra Skeleton Dogs:**

As Knuckles, go to Pumpkin Hill and get the extra life that is buried where the Shovel Claw was located. Then, go to Church Mountain and look around one of the graves closest to the wall. You should find a Skeleton Dog there. Restart the Level and do the same thing over again until you have as many as needed. The last time you do that, find a Chao Key and finish the level. It is easier to do this if you are on the 100 Ring mission or the Find The Chao mission.

### **Pumpkin Hill: Safe from fall:**

When you fall for a while, glide then do the Spinning Dig move and hold it down. You will bounce back up and be able to glide to safety. If you do not make it, repeat until you do.

### **Pumpkin Hill: Early lives:**

When starting Pumpkin Hill as Knuckles, go to the left rocket that takes you to Church Mountain. Then, take the rocket that leads to Pumpkin Mountain, which is somewhere in the graveyard area. While falling down from that rocket, quickly glide forward to the flying "island" in front of you. If done correctly, you should grip to the floating chunk of land and be able to go forward to get the extra life. This can be useful for people who are collecting Skel-dogs, because you can get it in the graveyard place before you take the rocket. There is also an extra life buried where the digging claw things used to be -- so this can double as an unlimited lives trick. Note: Skel-dogs are useful for people who are raising running Chao because they remove the boar's ugly features, and provide a running improvement of up to 16, without subtracting from other stats.

### **Radical Highway: Fire Ring:**

As Shadow, after the second highway you spring to, go backwards instead of forwards. You will see a rollie object that you need to somersault through to a new route. The new route leads to the Fire Ring that allows you to break steel crates. Note: You need the Light Shoes or you will not be able to get it.

### **Radical Highway: Got Ring? Blimp:**

There is a blimp with the message "Got Ring?" in the level.

### **Security Hall: Fast completion:**

In this stage you play as Rouge the Bat and are given 5 minutes to complete it. This can prove to be quite difficult. If you have enough lives you can do this trick. If you cannot seem to find the Emeralds, you should die. You will keep the existing Emeralds that you have collected. You will begin at the start of the level and the Emeralds will move to different places. This is the fastest method for completing the level if you are having trouble.

### **Security Hall: Cut through lasers without losing rings:**

As Rogue, get a running start and glide as fast as you can. If you are quick enough, when you touch a laser you will hear a spark but will not get hurt. You can only do this on lasers that are high. This is best done in the higher room with the switches.

### **Security Hall: Alternate shield color:**

Play as Rouge in the Security Hall under the hard difficulty setting. The shield robots will be holding black shields instead of red ones.

### **Sky Rail: Shortcut:**

There are places in the level where you can jump as Shadow from the rail you are on to a rail you are going past that you normally would not get to until later in the level. This method saves time, and it is fairly easy. Be careful -- do not jump to a rail that will take you back, adding time. Additionally, on the last rail, take the rail on the right versus the left. The one on the right slopes straight down to the goal. Also, crouch at the very beginning to go much faster.

### **Sky Rail: Find the lost Chao:**

The Mystic Melody and Light Speed Dash are required. At the second checkpoint there will be rail. Do not go on it. Instead, turn to the left and you should see the Mystic Block. Play the Mystic Melody and rings will appear. Do the Light Speed Dash and there will be a lot of bouncy things. Bounce up a few and at the top you will see the lost Chao. Go up a few more bouncy things to reach it.

### **Sky Rail: Ancient Light:**

As Shadow, skip the rocket and use the spring. Hit the bouncy propeller object until you get to the limit. You will see an enemy robot that you need to kill. Following him is a string of robots that you attack until you get to the Ancient Light for Shadow. It does the same thing as the Ancient Light for Sonic.

### **White Jungle: Ancient Light:**

To get the Ancient Light from the original Sonic Adventure, go to the White Jungle level as Sonic and keep playing until you reach the part where you are in a tree with many enemy robots. Jump up to the area with the box of rings. From there, walk to the edge of the platform until you see an enemy robot. Home attack it and keep going, attacking item boxes until you get to an extra life at the end of the line. There is also a 1-Up item which is the Ancient Light.

### **White Jungle: Fourth mission Emblem:**

There are no shortcuts in this level. To get the Emblem as Shadow, keep running and do not get hurt.

### **White Jungle: Easy points:**

When playing as Shadow there are two places where you get points for easy things. At the very start of the level, after swinging on your first vine, somersault under a fence for 500 free points. Then, when you are in a grassy area much like the area where Sonic gets his Ancient Light, instead of going the short way which leads to invincibility, somersault under a gate behind two robots. Dodge the sparking robot and when you reach two robots, one flying around one just standing, hit the flying one. Stay in the air as long as you can and bash the second one to get the usual 100 points, but you will also get 400 bonus points.

### **Wild Canyon: Special Dragon Animal for your Chao:**

Play as Knuckles in the Wild Canyon level. Get all three Chao Boxes. The first Chao Box will be the Chao key. When you get the second Chao Box you can get 2, 3 or 4 animals. With the third Chao Box, you can get the Dragon.

For an easier way to get a Dragon, start the Wild Canyon level and go to the place where you get the power-up on the wall you came out of. Look to where it and the left wall intersects. Climb up to find a Dragon. Go over there and play the Mystic Melody. Go forward and get the extra life. Restart and do it again.

### **Wild Canyon: Extra dragons and lives:**

Use the following trick to get a lot of dragons in about ten minutes. At the start of the Wild Canyon level, climb the tall pillar to your right. When you reach the top, get the extra life and glide to the pillar on the other side of the room. Then, glide onto the pillar closest to it and get the Chao box. Enter the "wind tunnel" and when you get to the top, go to your left. Go to one of the first cubes blocked by boxes. Punch the boxes for another extra life, then go to the end of the path. Once there, hit the Chao box, but avoid the animals. Once you get that, go to the path across from the one you that are in. Go all the way down and either kill or ignore the rhinos. Then, drop down into the statue area. Get the Chao box and the dragon, then exit and repeat this as many times as needed.

### **Defeating Sonic:**

In the Dark storyline, instead of trying to catch him off-guard, keep somersaulting at him. This makes the battle easy.

### **Defeating Big Foot:**

In the Hero storyline, you can defeat Big Foot faster by jumping on the wooden boxes. From here, you can attack him without having to wait until he lands. After he shoots out all the boxes, defeat him the standard way.

As Sonic, if you have the bounce attack, just bounce around Big Foot.

### **Defeating Eggman:**

In the Hero storyline, during both battles with Eggman forget about the lock-on missile -- it is too slow. Instead, rapidly attack him with your Vulcan cannon.

### **Defeating Egg Golem:**

Beside climbing the stairs on Golem's back, you can hit him another way. You can only do this when he has two or less hits remaining. When he uses his head butt of death, stay to the

side of his fists so the head misses. Then, get directly under the head. He takes a few seconds to pick it up again -- use a bounce attack to hit the "battery".

### **Defeating Shadow:**

In the Hero storyline, during both Shadow battles you can use the same strategies. Shadow cannot defend against the bounce attack.

Instead of trying to catch him off-guard, keep somersaulting at him. This makes the battle easy.

### **Defeating King Boom Boo:**

In the Hero storyline, only run fast enough so you can see his face. When he starts breathing blue fire, you will have more than enough time to punch the ghost holding the hour glass while he is preoccupied making his wall.

King Boom Boo has one attack called the Chomp Attack. Be careful, because he also speeds up when he does it. If you slow down, quickly speed back up or he will speed up and attack.

### **Make Omochao angry:**

Pick him up and throw him around. If you throw him at an enemy, he will explode. You can even shoot him with Eggman or Tails while he is flying around your head.

### **Big the Cat appearance:**

#### **Aquatic Mines level:**

You can also find Big the Cat when the water is all the way up and you look through the cage with the caution side.

Cannon's Core level (as Tails): When you take the first elevator down, you will see Big below hanging on to the wall to the right (or left).

Cannon's Core level (as Knuckles): Big can be found inside of the wall near where you find a lot of lasers close to the ending (next to the ground that is green on the right side). He is waving to you.

#### **City Escape level:**

Big the Cat appears after the last corner in the G.U.N. truck vs. Sonic scene. Look for him at the right of the screen, running downhill on the sidewalk away from the truck.

Colony's Core (as Sonic): Note: this is the last part. When you are going down the slides, jump on the pillar to your left (the one with the timestop switch). Look across from you on the other pillar to see Big.

#### **Crazy Gadget level:**

Reach the room with all the color boxes. When you first get to the yellow one, jump down to land on another yellow piece. Big will be jumping up and down on it -- you can reach him.

Crazy Gadgets (hard difficulty): Big will be hanging on to the blue block instead of on the yellow block.

#### **Cosmic Wall level (as Dr. Eggman):**

When you are on the second train-like rail car immediately after you reach the top of the first hill, spin the camera angle around to see behind Dr. Eggman. Big will be sitting on the corner of the platform behind you.

#### **Death Chamber level (as Knuckles):**

Go in the middle, where the big engine is located. Climb around it in one location and you can see Big the Cat inside of it.

**Dry Lagoon level (as Rouge):** Go to the turtle and rescue him. Then, go to the other place with the underwater swimming turtle. Grab hold of him and on the way to the under prison, look on the bottom right of the screen to see the lower half of Big sticking out of the sand.

Look carefully and make sure you are entering the tunnel, and not the exit.

### **Egg Quarters level:**

Go to the green room with the eight pillars. In the middle of the room is a Mystic Melody ruin. Stand on top of it and jump up. On the wall to the left (or right), Big is holding on under a flower.

### **Green Forest level (as Sonic):**

Big can be seen (barely) on a platform against a tree, immediately after the part when you home attack two enemies that are floating above platforms. Look to the left to see the large platform against a tree. Big is a little difficult to see.

Hidden Base level (as Tails): When you reach the entrance to the first pyramid, look to the right. Big will be sitting on a metal girder that is around a large statue against the wall.

### **Iron Gate level (as Dr. Eggman):**

When you reach the first elevator, jump off and hover (or fall towards the wall with the exit on it.). Keep falling to see Big hanging onto the wall.

### **Last episode level (as Rogue):**

Go to the top, and when you press the button, fly the same way that you got there. Climb up on the wood thing and you should see Big the Cat. You cannot go there -- he is just turning his back at you.

### **Last? story level (as Dr. Eggman):**

As you fall down a ravine with lasers, Big is sitting on the far left ledge near the three water enemies.

### **Metal Harbor level (as Sonic):**

Big can be seen when you reach the rocket that takes you to the big rocket. Look around to see him sitting on a platform off to the side

### **Meteor Herd level:**

Big can be seen below the light screen window that is close to the lava. He is hanging on the middle of the ledge. Note: It is located close to the huge platform that has a sign that reads "0-2 0-3". He is difficult to spot.

### **Prison Lane level (as Tails):**

Go to the room with the "elevator". In one of the cells you will see something sticking out on the left side. Move the camera so its pointing to that cell to see Big the Cat.

Pumpkin Hill level (as Knuckles): Go to the one of the train gates. You can see Big the Cat hiding behind the gate, waving to you.

### **Pumpkin Hill/Mountain level (as Knuckles):**

Go to the Ghost Train Turntable and drop down to the tracks. In one of the barred tunnels, Big the Cat will be waving at you.

### **Pyramid Cave level (as Sonic):**

You can see Big the Cat on the far left side of the screen, behind the fence on the first rail you grind on.

### **Radical Highway level (as Shadow):**

Go to the rocket that takes you over the "Got Ring?" blimp. Big the Cat will be looking down. When playing under the hard difficulty setting, you will see him hanging from the blimp instead of looking down.

### **Sand Ocean level (as Eggman):**

Big can be seen immediately near the end ring. Turn the camera to see Big sleeping on a platform off to the side.

### **Security Hall level (as Rouge):**

Immediately when you start the level, go to your right or left and reach the ledge directly next to the hole with the A/C tubes in it. Move the camera so you can see under Rouge, and you should see Big hanging onto a wall. Note: You can use Drill Drive to attack him and pass through him like a ghost.

### **Sky Rail level (as Shadow):**

Immediately at the start of the level, when Shadow is grinding down a pole, look at the girder behind him. You will see Big sitting on a girder in the background. Note: You will only see his head unless you jump.

### **Weapons Bed level (as Eggman):**

Big is sitting on top of the first garage with TNT packs on it.

### **White Jungle level (as Shadow):**

You can see Big at a platform on the right of the screen when swinging on the last vine with the waterfall. After seeing him, look up to the top right-hand side to see Big sleeping on a giant heavy looking leaf on a tree just before you reach the goal ring.

### **White Jungle level:**

Big can be seen again at the end of the level. Before you hit the ring, turn the camera to the right to see Big sitting on a tree to the left.

### **Wild Canyon level (as Knuckles):**

Go forward and up the wind. Go over to the wall in between the two paths you can go, and climb up. Big the Cat will be hanging on for life.

You can also see him in the battle against Sonic while playing as Shadow.

In the Tails level where you are running from the police and you first get your hover ability, Big the Cat can be seen again. There is a part in the level where you need to knock a column over in order to use it as a step to reach a higher level, from which you hover over to a platform with a police barricade and two robots. If you miss the platform and fall in the hole, you will see Big the Cat sitting on the girders underneath the platform.

In the intermission when Sonic beats up the Egg Golem (Dark storyline) look against the wall to see Big behind one of the doors, jumping up and down,

After you complete Final Hazard, and Shadow and Sonic get ready to use the Chaos Control, Big will sometimes be seen floating around in the background.

Play as Rouge and do the battle against Knuckles. At the end when you and Knuckles are saying "Whew", Big will walk across the beam behind you.

### Unlocking hidden games:

When you initiate Sonic The Hedgehog 1, 2, 3, Sonic And Knuckles, Sonic 3D blast, Dr. Robotnic's Mean Bean Machine, or Sonic Spinball, the screen states that it is logging the game data. That indicates the game is logging in that you have initiated that game once. After initiating a game fifty times, it no longer shows that game-logging screen. It stops the logging sequence screen from ever starting a game again and from then on, just starts the Genesis program itself. To unlock a hidden game, you must start a particular Mega Collection game fifty times, continually pressing Z to exit it, then enter into the game repeatedly. Some hidden games do not necessarily require that you start up fifty times, but you eventually need to do so to unlock all the hidden games.

Flicky: Start Dr. Robotnic's Mean Bean Machine before reaching 50 times. Alternately, have a memory card in slot A with a saved game from another Sega game.

Blue Spheres: Start Sonic The Hedgehog and Sonic 3D Blast twenty times each.

Sonic 3 And Knuckles: Unlocked sometime in the process of starting Sonic 1, Sonic 3, Sonic And Knuckles, and Sonic 3-D Blast fifty times.

Knuckles In Sonic 2: Unlocked in the process of starting Sonic Spinball and Sonic 2 fifty times.

Ristar: Start the following games fifty times: Sonic The Hedgehog, Sonic The Hedgehog 2, Sonic The Hedgehog 3, Sonic And Knuckles, Sonic 2 And Knuckles, Sonic 3 And Knuckles, Sonic 3-D Blast, Sonic Spinball; and start Blue Spheres 30 to 40 times.

Comix Zone (Japanese version): Select manual mode, then press Z(3), Up(3), Down(3), L, R, Z. A sound will confirm correct code entry.

The Ooze (Japanese version): Select options mode, then press Up, L, Down, R, Up, Z, Down, L, Up, R, Down, Z. A sound will confirm correct code entry.

**Unlimited lives:**

**Special Zone entrance:**

You can almost always have the Special Zone entrance open (the giant ring next to the sign at the end of level Acts 1 and 2) by not losing your rings. **Unlimited speed shoes:**

Begin game play in two player vs. mode and hit as many item boxes as possible until you get the speed shoes. You will return to the start of the level or the last Star Post that you hit, but you will now have the speed shoes in effect for the rest of the stage.

**Super Sonic sign:**

The sign will show Super Sonic for one second, then show blue Sonic again.

### **Starry Super Sonic:**

Get all the Chaos Emeralds and collect fifty rings, but do not transform into Super Sonic yet. Find an invincibility monitor and spin (do not jump) into it. Then, transform into Super Sonic. If done correctly, the stars will surround Super Sonic until he runs out of rings and transforms back into blue Sonic. Note: This does not improve Super Sonic's performance

### **Stronger Super Sonic:**

Enable the "All emeralds", "Level select", and "Debug mode" codes. Go to Oil Ocean (either act). Become Super Sonic, then stand on one of the green/yellow colored cylinders. You should now be able to jump twice as high and fast.

There are a lot of surprises where the floating sales was, including find a rock you can lift with a lot of effort for 30 Scarabs.

Look under the rocks by the sea with the staff. There will be two red Scarabs, each worth five. Leave, then repeat for more Scarabs. The small rocks on the land have three green Scarabs, each worth one.

Go to the store and play the Scarab game. Gamble one to three Scarabs. Find them within the time limit to double your Scarabs.

**Thorntail Hollow: Re-lighting the torches:**

To re-light the torches, find the tree in the Hollow that has branches on fire. Strike the tree to cause these flames to drop. Then, strike them with your staff to douse the flames. Collect three of these and put one in each of the three torches scattered through the hollow. Then, have Tricky use his Flame on them to light the torches. Once all three are lit, you will receive the key to Moon Mountain Pass

**Thorntail Hollow: Cheat Token:**

Find the Cheat Token in the lobby of the store. Get it to unlock the staff credits.

**Thorntail Hollow: Staff energy upgrade:**

There is a staff energy upgrade located near the entrance to the SnowHorn Wastes. You must use a Bomb Spore to reach it.

**Thorntail Hollow: Staff rocket boost upgrade:**

Look for a rocket boost pad to the left of the store entrance. Go up it and plant a Bomb Spore. Blow it up, then go inside of it. Shoot the targets to get it.

**Thorntail Hollow: Staff fire blast upgrade:**

The staff fire blast upgrade can be found in a cave in Thorntail Hollow.

**Volcano Force Temple: Cheat Token:**

After you place the Spell Stone obtained from the first Boss, leave the temple. When you are leaving, you will hear a voice of a person who needs help. A Krazoa Spirit appears and tells you that you have to help her by defeating the monster that appears. The Krazoa Spirit opens a large round door. Go through it and get the Earthquake upgrade for the Staff. You must now defeat the monster. First, use the Earthquake attack and the monster will spin in a circle once or twice. While he is spinning, attack the purple scar on his back. Repeat this one more time, then take the Moon Seed from him. Return to the temple. When you get to the point where you had to put the Force Stone on the floor, the gate slides to the side, giving you a way to the temple. Defeat the armored Sharp Claw then walk to the left ledge. You will climb down a wall. Next, go all the way over to the patch of dirt. Plant the Moon Seed and get Tricky to use

his Fire command. The plant will grow, leading you to a well. Give it 20 Scarabs and it will give you a Cheat Token.

### **Volcano Force Temple: Staff ice blast upgrade:**

The staff ice blast upgrade is in the Volcano Force Point Temple. You will find a room with a huge torch. Hit the lever and you will have a certain amount of time to light the torch spots.

### **Walled City: Second tooth:**

Find all the Earth Walker soldiers. Beside them will be trees. Look in the trees to find switches to hit with the flame shooter. Hit all of them and a ring will appear in the stream. Go through the ring to start a challenge race. Complete it to get the second tooth.

### **Find the Queen Earth Walker:**

Get the staff and the fireball upgrade (in a cave in Thorntail Hollow). Go to a place with a stone fence-type thing. There will be a red target up above the door inside the fence. Shoot it, defeat the Sharp Claw, then go through the door.

### **Introduction sequence:**

Allow the game to idle at the title screen until the introduction sequence begins. During the sequence, note that Fox has only 3 life points the entire time and has only a small staff magic meter. No matter what area he is in the game, he still has the minimum of life points and magic points. It is impossible to do this during the actual game.

### **Krystal's Staff in ending sequence:**

At the end of the game when you are back on the main ship, the intermission sequence shows Fox with Krystal's Staff on his back, even though he left it with Krystal back on Dinosaur Planet.

### **Floating Grubtub:**

Freeze a Grubtub while it is in the air. It will not fall, but will instead float.

### **Tricky transforms:**

Allow the game to idle for awhile, then start playing again. Tricky will laugh, then sometimes turn into his original polygon form.

### **Fall through level:**

In Cloud Runner Fortress, after the part where you have to save the Queen Cloudbunner's babies, go to the cage where the Queen is located. Zoom up with your high definition display device, then allow the game to idle. When you resume the game and are about to approach the cage, you will fall through the entire fortress and get stuck in the clouds.

**NIGHT:** Fly through all the sensors and when you come to the end of the canyon go take the left route. You should come to an Imperial outpost. A small movie will play pointing out the TIE. To capture it, simply kill the little black pilot running around. A blue rebel medal will appear. Fly into it so your craft will land. Now you will have the TIE. You will be able to cruise over the Academy with out being detected. Once you fire your weapons they will come after you.....so beware. Go and capture the shuttle and complete the mission. **YOU MUST DO IT IN DAY AND NIGHT TO GET THE TIE FIGHTER.**

**DAYTIME:** Use your Ion Cannons to disable all the sensors in the canyon. Once you get past them all fly almost directly behind you until you come to a large foggy area with a Communications Tower. **DO NOT LET ANY IMPERIALS SEE YOU EXCEPT FOR THAT COMM TOWER AND THE TIE.** There will be a TIE fighter hiding to the left of the comm. tower. Disable the comm. tower with your ions. Then give the TIE a few blasts until it takes off. Once it is flying give it a blast or two with your ions. Back off and it will go land to the far left of the comm tower. A blue rebel symbol will appear like the one at night. Fly into it and capture it. The Imperials will know you stole it, so try to avoid laser turrets and TIEs. Go and capture the shuttle and complete the mission.

The TIE will be in the small room to the right of the Millennium Falcon

**Battle Of Endor: Homing cluster missiles tech upgrade:**

When you get to the part where you attack the Star Destroyers, after you knock out the destroyer on the left (when you first approached them), it will slightly and point downward. Look in the area below the docking bay. The upgrade is floating at a point in space.

**Battle Of Endor: Repair ship:**

If you find yourself low on shields before fighting the Star Destroyer, move to the hanger side of Admiral Ackbar's ship. Make sure you are going at regular speed (release L + R) then slightly nick the side of the ship, not enough to kill, but enough to weaken you more. If done correctly the repair screen will appear. Quickly select the control panel to repair your ship.

**Battle Of Hoth: Advanced lasers tech upgrade:**

After the intermission sequence with the shield generator exploding, turn around and fly back to that area. The upgrade is where the shield generator was destroyed.

**Death Star Attack: Advanced shields tech upgrade:**

It is found in the second part of the mission (when you fight the TIE fighters). When that part starts, dive down and slightly to the left. The upgrade is on top of a building next to a tall turret. It is difficult to see, and you may have to search for a while.

**Imperial Academy Heist: Spread proton bombs tech upgrade:**

During this mission in the night time, the tech upgrade is located in the hangar opposite of where the daytime upgrade was found.

**Imperial Academy Heist: Advanced concussion missile tech upgrade:**

During this mission in the daytime, when you get to the main base, there is a hangar to the far left of the tall tower in the centre of the base. The upgrade is inside.

**Ison Corridor Ambush: Advanced proton torpedo tech upgrade:**

At the beginning of the level is a large piece of floating debris ahead and below you, with a hole through it. The upgrade is inside.

**Ison Corridor Ambush: 1969 Buick:**

When you get to the part where you have to destroy the TIE Interceptors, make a 180 degree turn and head for the last transport in the lineup. Fly around slowly behind and just below this transport. The car is very small -- about the size of one of the men running on the ground. Look for black dots to find it. You cannot do anything to it. It does not do anything to you, and is just there floating along with the transport.

**Prisons Of The Maw: Advanced cluster missiles tech upgrade:**

When you are ordered to take the comm towers out, you should encounter a single tower next to a domed building. Destroy the building. The upgrade is inside.

### **Raid On Bespin: Homing concussion missiles tech upgrade:**

As soon as you destroy the first gun-balloon, boost over to the next platform. There will be a large ship next to a platform. Destroy it. The upgrade is on the platform next to where it was. The explosion of the ship exposes it.

### **Raid On Bespin: Destroying balloon guns:**

Instead of individually shooting the guns attached to the balloons, just shoot the propane tanks. This will destroy all the guns immediately. The tanks are located up in the balloon.

To destroy the guns on the hot-air balloons quickly and easily, approach the balloon low. Then, aim upwards towards the balloon's burners and fire at them. With only a few shots, you will take out the entire balloon along with all of the guns. Note: You score kills for all of the guns as well as for the balloon itself.

### **Raid On Bespin: Fly Cloudcar:**

Once defending all the platforms, you will go to Cloud City, where you have to knock out three generators. After the intermission sequence ends, your craft should be entering the city. As soon as you fly over the first building, dive down to the rooftops. To the left, you should see the rebel icon symbol spinning. Fly into it to switch to the Cloudcar. The Cloudcar is very manoeuvrable, making it easier to destroy the generators, but its lasers lack power, making it more difficult to destroy the bombers during the last part of the mission. This is the first of two locations where you can switch over to a Cloudcar in the city.

### **Razor Rendezvous: Advanced proton bombs tech upgrade:**

As soon as the level starts, boost towards the Star Destroyer. There will be an Imperial Shuttle that will be flying to the right of the Star Destroyer's bridge. Destroy the Shuttle. The upgrade is inside.

### **Strike At The Core: Advanced targeting computer:**

When you are almost out of the tunnel approaching the Core, the upgrade can be found under some pipes on the lower right.

### **Tatooine Training: Bonus item locations:**

You have to find two bonus items during each of the four times of the day in order to earn the Naboo Starfighter (N-1). The item which you have to locate during each time of day is the Krate Dragon bones. They are found near the large group of training icons, in between a Bantha herd and a Sandcrawler. During dawn and dusk, you will need to find C3PO. He is inside Jabba's Palace, which you will need to destroy. Be careful not to also destroy C3PO. During normal daytime, you will need to find the Escape Pod. It is located on the ground in the open near Tosche Station. At night, you will need to find R2D2. He is located inside of the Sandcrawler that is near the Krate Dragon bones. You will need to blow up the Sandcrawler with linked lasers. Again, be careful not to also destroy R2D2 when you attack the Sandcrawler.

### **Tatooine Training: Bullseye Womprats faster:**

If you shoot 60 or more Womprats in your first attempt, you will not have to return and to shoot 20 or 40. If successful, the completion time will be the same for the 20, 40, and 60 bullseyes at the mission complete screen.

### **Vengeance On Kothis: Homing proton torpedo tech upgrade:**

On the crashed Star Destroyer, there is a hole through the bridge on the right side (facing from the rear). The upgrade is inside.

### **Vengeance At Kothlis: Easy bombing:**

Choose the Y-Wing, turn on your targeting computer, then enter bombing mode. This uses your targeting computer efficiency, so do not do it that often. This technique is extremely effective when destroying the AT-PTs in the Vengeance At Kothlis mission.

### **Battle Of Endor: Double Millennium Falcons:**

After you unlock and can use the Millennium Falcon, go to the Battle Of Endor mission with it. You will notice two Millennium Falcons in the mission -- the one you are flying and the one Lando is flying.

### **Start with full shields after intermission:**

You can use the following trick before any intermission sequence if your timing is correct. When you are low on shields, before the next intermission sequence starts, intentionally crash your ship into something so that while it shows your ship exploding the next intermission sequence starts. Once you get control of your ship after the intermission, you should have full shields and the same number of lives you had before the intermission started.

### **Death Star Attack mission commentary:**

Press Y in the hangar to hear more about the X-Wing. The game will tell you how the X-Wing was the fighter that killed the Death Star, even though your current mission is to destroy it.

### **Triumph Of The Empire: No sound effects:**

Fly out of the fighting area until the intermission sequence starts to force you back. However, before going out of bounds (or at the exact same time) press Start to display the options menu. If done correctly, when the intermission sequence begins, the options menu music will play with no sounds from the battle.

### **TIE Fighter appears as TIE Advance:**

When you unlock the secret mission, Triumph Of The Empire and also unlock the regular TIE Fighter, the intermission sequence before you begin will show your ship as the TIE Advance. This also implies if you let the Death Star explode, the cut-scene after that will show your ship as the TIE Advance.

### **TIE Fighter appears as torpedo:**

Shoot a TIE Fighter or any enemy that flies on the back and they will resemble a torpedo. However they will not collide or anything else.

### **Floating Rebel troop:**

In the Battle of Hoth mission near the AT-ATs, there is a floating Rebel Troop facing Outpost Beta

## **Super Mario Sunshine**

### **Return to the Airport**

Once you've beaten the game (and saved your game), you will be able to go back to the Airport from the very beginning. It'll cost you, though. For the price of 10 coins, a boat close to the clock tower where you find Yoshi will take you to the Airport level -- which is filled with coins and fun stuff to do. Give it a try!

### **Sunglasses and Hawaiian Shirt**

Want to see Mario in a different outfit than his trademark blue overalls and red shirt? How about putting on some shades and slipping into a shirt that would make even Tom Selleck jealous? The shades are easy to get. Look for a man with black sunglasses in the hub world (he's at the beach, close to the fruit stands) or in most of the other levels and talk to him. When certain conditions are met, he'll give you a pair of sunglasses to wear, which will darken your screen appropriately. Note, the sunglasses will disappear the moment you step into another level or restart the game.

The same guy will also give you a Hawaiian shirt -- but you've got to do some work first: finish the game. If you've saved your game after you beat the last big boss, you'll be able to get your shirt anytime you talk to this guy.

### **End Bonus**

Successfully complete and save your game. Then you can pay 10 coins to use a boat near the clock tower where Yoshi is found to return to the Airport level at the start of the game.

### **Alternate ending screen:**

If you complete the game with 119 stars or less you will get an ending screen in which el Piantissimo inspects the paintbrush. However, if you finish it with all 120 sprites, the ending screen will show all the characters in the game.

### **Avoid losing health when falling:**

When falling from high places, press L to do a Ground Pound. This will make you fall very fast and not lose health

### **Sleeping Mario:**

When playing the game, don't play the game and Mario will fall asleep

Where are the secret levels:

After almost every obstacle course, there is secret level in which you go to the obstacle course and Ground Pound a red button to find eight Red Coins in a certain amount of time.

### **Get easy lives:**

Whenever you complete a level, go to the water directly next to where the boats go in and out. Dive all the way to the bottom and you will see a 1-Up Mushroom. Whenever you return from a level or start from the beginning, it will be there.

### **Get extra stars on secret levels:**

After you complete a secret level, go back to that episode and replay the secret level. This time there will be a red hump on the ground. Ground Pound it and get the red coins. There will be a time limit, but you have FLUDD to help you.

### **Clean easily:**

Instead of taking a bath each time Mario gets dirty, do one or two spin jumps.

### **Jump onto buildings:**

Use a Ground Pound on a manhole cover then immediately jump up. This will send you high into the air. Use a Hover Nozzle to get on the building. Note: Some items, such as Shine Sprites and Blue Coins, can be found on roofs.

**Jump higher:**

Run in one direction, then turn in the other direction quickly enough so that Mario stirs some dirt up. Then, jump immediately in the air. Mario will jump higher and do some flips.

**Spinning jump:**

After jumping, you can do a spin by rotating the Analog-stick once in a circle.

**Sprinkler Water Spray:**

To execute the Sprinkler Water Spray easily, do a Spin Jump and hold R.

**Yoshi's Spritzer Squirt:**

Press R, then press A.

**Cover more area with your FLUDD:**

Jump three times to do a forward somersault. As you roll, shoot your Nozzle Cannon and spray a long distance in front, behind, and below you.

**Avoid losing health when falling:**

When falling from high places, press L to do a Ground Pound. This will make you fall very fast and not lose health.

**How to swim faster:**

When swimming, switch to your hover and press R. It will give you a little boost while swimming

**Spray birds:**

There are birds in almost every level in the game. Spray a green bird for a Yellow Coin, a blue bird for a Blue Coin, and a yellow bird for a Shine Sprite.

**Select files with moves:**

Choose a file and do a Spin Move and the Side Jump to get onto the blocks.

### Play Extra/Master Stages in Practice Mode

After reaching them in the Normal mode, you CAN play the Extra and Master stages in Practice mode. When selecting the difficulty from "Beginner", "Advanced", and "Expert", simply go further to the right, and you'll be able to select the Extra and Master stages.

### Advanced level 18: Warp:

During the start of race against the goals on the giant musical note, just roll off the head of the first arrow on the right. You will fall to the bottom of the course. Wait for the red goal to swing around and roll directly through it. You will warp to level 25, the obstacle-like course.

### Advanced level 25: Green goal:

Advanced mode level 25 has a green goal which can be reached by stopping at the blue goal and taking the pathway. Do not take any of the shortcuts unless you are very skilled, and are short on time (under twenty seconds). This will take you to level 28

At the very beginning, go to the left slightly (enough to clear the "boing" posts). Go as fast as possible directly into the hole. You will fly over the hole and the ledge will function as a ramp, which will propel you over the fences and the gap. You will fly directly into the green goal. Go through and you will warp to level 28.

### Beginner level 6: Easy finish:

Just jump off to the right.

### Expert level 2: Warp:

There is a warp door in the second stage of expert mode. The stage has two doors, the red one is the warp. It has bananas on the front. To reach it, you must climb a narrow path.

### Expert level 8: Easy finish:

Just jump off to the right. You have little time and you must be careful because of the gaps.

### Finding bananas:

Note where your monkey's head is turning to find the closest banana, whether it can be picked up or not

Each hole in one after the first one should be worth \$1,500,000, and they do not have to be done back to back. This is more of a helpful hint, rather than a code. If you miss a Real Time Event, no worries, simply set the date on your system configuration menu to the date you missed and voila...you can now play that event! Subsequently, if you want to fast forward to a certain date, that works too. When all is said and done, remember to set your clock back to the correct date.

Tiger Woods PGA Tour 2004 revolves around making money. All games modes you play (with the exception of Practice) earn you cash, and at the completion of every round you will be rounded back to the pro shop. If your not sure where to start try out the World Tour. The difficulty ramps as you play through, but with increase difficulty comes increased purses. For the hardcore golf enthusiasts try out the PGA Tour Season Mode. Although this mode takes a bit longer to progress, it is also worth the most money. It is also worthwhile to mention that the more you win the more difficult the events become.

### **Extra Holes**

Enter "sherwood target" (case sensitive without quotes) in the password section and it will give you a special 3-hole tiger scenario mode at Sherwood Country Club.

### How to find Bones

To Unlock Snoop, collect the 30 bones scattered throughout the city. Once unlocked, you have an hour to solve as many random crimes as you can for points. Depending upon your score, you get a different title, such as "Lap Dogg" or "Top Dogg."

For those of you that have not found your first Snoop Dogg dog bone, here is a hint: In downtown across from City Hall (Spring St/Broadway), drive straight from the steps at City Hall and when you get past the bushes you will find the first bone. Once you have found the first bone all of the others will appear on the city map. But .... I bet you didn't know that the bones rotate and point at the next closest bone.

### Codes to inlock Snoop

From the city map screen press R trigger, Dpad Up, Dpad Right, Dpad Left, Dpad Down, push Z, then push Z again, then press A then Y, then X, then Y. ### **Act II Level I**

Immediately turn around and head in the opposite direction, run up the slight incline and jump over the edge (the fall won't hurt you). At the bottom, turn left around the corner and run almost straight towards a tall building with windows at the top. At the front of that building, you will find a ladder. Press the appropriate button to climb to the top, and use your claws to bust through the windows. You will find an health icon inside. Go back outside (on the same side as the ladder) and look to the right (if you are facing the ladder). You will see a chain link fence. Go through it and then go through the next chain link fence. You will be at the power generator. Stand in front of the generator with a tear in it, and press the appropriate button to activate things (B on Xbox). Wolverine will take damage, but with the health pick up, he will not die. This will activate the generator. The large gate will be unlocked, but you won't be able to approach it from the front. Sneak around to the left of the now open gate and enter from the left. Once inside make your way around to the room that has a cracked wall and a container in front of it. Attack the container and the wall will blow apart. Inside this next room will be the Comic Book Icon for the Classic Yellow and Blue costume.

### **100% health Act II Level I**

Locate the health icon in the building as explained above and you will receive approx. 50% health. Instead of starting the generator, go to the bridge (across from the generator) and jump across the gap. You will see an enemy slip near the back of the truck. Go around the side of the truck, while using your senses (but be quick). As you approach the enemy in Senses mode, you will activate a Strike mode. Press the appropriate Strike mode button for the console you are playing on and Wolverine will throw the guard through the box in the truck and earn him a Strike bonus as well as another 50% health icon. Now the level will be much easier to complete.

### **Beat Wendigo**

Dodge the falling ice. Wendigo will run at you. Keep running away from him till he stops and immediately run behind him and hit him once or twice till you get the strike effect available.
