

FREE SAT TV On Your PC

You may need a couple of extra pieces of software for these channels to work, although most people will already have them installed on their PC.

The software needed is :

Windows Media Player <http://www.microsoft.com/windows/windowsmedia/players.aspx>

RealPlayer <http://uk.real.com/player/>

There is a free version of RealPlayer you can download here, you don't need to pay for the full version as the free version will work fine. You should see a link in the bottom right corner of the page that says, "Download the Free RealPlayer Only". Please ignore the 14-day free trial links.

To watch any of these channels just click on the link and the program needed (or a browser window) will open automatically.

Some of the streams need the latest version of Windows Media Player and RealPlayer so if you have any problems try updating to the latest version and see our "Guide To Watching Streaming Media On Your PC" at :

<http://www.clearance-bargains.co.uk/freesattv/streaming.htm>

If you want to watch one of the football games make sure you get on the stream as early as possible.

Please remember these streams and links do go down from time to time just like any other link on the internet and as a result it is unlikely they will all work all of the time. If you find one of the links isn't working come back and try it again later.

Football :

The two following sites now charge for membership and as such do not adhere to the auction title "Watch SAT TV + FILMS On Your PC For FREE". They are, however, included to give you access to even more streams should you wish to spend a few extra pounds :

Live U.K Premiership and Internationals at <http://www.freelivefootball.co.uk/> (£2.99 Membership Fee)
